The Aptitude Myth Cornelius N. Grove, 2013-06-19 The Aptitude Myth addresses the decline in American children's mastery of critical school subjects. It contends that a contributing cause for this decline derives from many Americans' ways of thinking about children's learning. They believe that school performance is determined very largely by innate aptitude. The Aptitude Myth traces the deep historical origins, the spread and elaboration, and the eventual triumph of the belief in the determining power of mental abilities given at birth and therefore fixed. Covered is 600 B.C.E. until 1926 when the SAT was first administered. The belief in aptitude assumed by many Americans to be the modern view of learning ability is revealed as an archaic way of thinking that originated in the imaginations of our ancient forebears and gradually gained credibility over 2500 years. In recent times the belief became elaborated to include the fanciful notion that more than modest academic study injures a child's health. Having inherited this mindset, Americans don't know how to insure that children gain mastery. A new mindset is needed. The final chapter offers a transformative mindset.

Community based research in sport, exercise and health science Robert J. Schinke, Kerry McGannon, Brett Smith, 2016-01-08 Community based research has recently gained attention within the sport and exercise sciences. When seeking to understand community based research methodologies, one finds a diversity of approaches spanning a breadth of ontological views and equally diverse methodological approaches. Though little is known about community based sport exercise and physical activity research, these foci are beginning to gain scholarly attention in part through the emerging sport for development and peace literature. This book features a conceptual introduction and eight pioneering examples of community based research from North American, European, and Oceanic scholars. The topic matter reveals scholarship undertaken in relation to health, physical activity, youth sport, and elite sport, exemplifying work with mainstream and marginalized populations. This book, perhaps the first compilation of community based research relating to sport exercise and health, will be of interest to sociologists of sport, sport and exercise psychology scholars, sport management scholars, qualitative researchers, health scholars, and practitioners, sport for development organizations, and research ready communities seeking to engage in localized research projects. This book was published as a special issue of *Qualitative Research in Sport Exercise and Health*.

Pollinators and Pesticides Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-04-05 If farmers had to pollinate fruit and vegetables without the help of insects, it would cost hundreds of millions of pounds, and we would all be stung by rising food prices. Defra Ministers, however, have refused to back EU efforts to protect pollinators. Disease, habitat loss, and climate change can all affect insect populations, but a growing body of research suggests that neonicotinoids are having an especially damaging impact on pollinators. The weight of scientific evidence now warrants precautionary action, so the Committee is calling for a moratorium on pesticides linked to bee decline to be introduced by 1 January next year. An EU wide moratorium on the use of imidacloprid, clothianidin, and TMX on crops attractive to bees, following a recent risk warning from the

European Food Safety Authority has also been proposed Many of the UK s largest garden retailers have voluntarily withdrawn non professional plant protection products that contain neonicotinoids A full ban on the sale of neonicotinoids for public domestic use which could create an urban safe haven for pollinators is recommended The pesticide industry must open itself to greater academic scrutiny if it wants to justify its continued opposition to the precautionary protection of pollinators The Government s National Action Plan for the Sustainable Use of Pesticides published earlier this year was a missed opportunity according to the Committee Clearer targets are needed to reduce reliance on pesticides as far as possible And Integrated Pest Management which emphasises alternatives to pesticides but does not preclude their use should be made the central principle of the plan

Computational Intelligence and Mathematics for Tackling Complex Problems 3 István Á. Harmati, László T. Kóczy, Jesús Medina, Eloísa Ramírez-Poussa, 2021-08-25 Complex problems and systems which prevail in the real world cannot often be tackled and solved either by traditional methods offered by mathematics or even the traditional computer science CS and and artificial intelligence AI What is the way out of this dilemma Advanced methodologies and tools and techniques mimicking human reasoning or the behavior of animals animal populations or certain parts of the living bod based on traditional computer science science and the initial approaches of artificial intelligence are often referred to as biologically inspired methods or often computational intelligence CI Computational intelligence offers effective and efficient solutions to many unsolvable problems problems However it is far from being a ready to use and complete collection of approaches and is rather a continuously developing field without clear borders The emerging new models and algorithms of computational intelligence are deeply rooted in the vast apparatus of traditional mathematics Thus the investigation of connections and synergy between mathematics and computational intelligence is an eminent goal which is periodically pursued by a group of mathematicians and computational intelligence researchers who regularly attend the annual European Symposia on Computational Intelligence and Mathematics ESCIM Some relevant papers from the last ESCIM 2020 are included in this volume *Soviet SCI_BERIA* Ksenia Tatarchenko, 2024-10-03 At first glance the Novosibirsk Scientific Center or Akademgorodok appears as an outlier in academic excellence This science city is renowned for a preeminent university dozens of research institutes and a thriving technopark At home it is an emblem of Russian innovation abroad it is often portrayed as a potential threat a breeding ground of cyber soldiers Though Siberia has been the main source of post 1991 Russian carbon revenues its soviet history and cold war legacy of internationalism demonstrates that territorial and scientific dimensions interlocked the moment the Siberian Branch of the Soviet Academy of Sciences was created in 1957 Drawing on

a wide range of previously unexplored archives Soviet SCI_BERIA focuses on how the post Stalinist Siberia was redefined and represented through the ideal of rational development the late socialist innovation practices and the relationship between experts and the state It offers a fresh insight into the transition from Soviet to post Soviet Akademgorodok In doing so Tatarchenko not only fosters a conversation between history area studies and science studies but also sheds new light on Soviet modernity and the limits of its transformative projects

Designing Emergency Management Wee-Kiat Lim, 2020-11-22 This book looks at the then nascent emergency management sector in China specifically the 2003 2012 period that arose from the 2003 SARS crisis and subsequently set the stage for its responses to the COVID 19 pandemic Covering not only the amended and new laws and regulations at the national level the book also includes the rearrangement and creation of the organizational structures as well as the response plans for individual emergencies that were either recrafted or created during this period Beyond chronicling the milestones and products of this transformation this book highlights the key ideas and ideals that guided the various stakeholders from the governing elites to the policy experts during this process The book demonstrates how definitions of emergency management and emergency categories as well as other ideational objects were initially either absent or weakly developed but were refined to the extent that they helped corral disparate actors into China's new organizational field of emergency management
