Commercial Management David Lowe, 2013-05-31 Commercial Management theory and practice defines the role of commercial management within project oriented organisations providing a framework for and helping to develop a critical understanding of the factors that influence commercial management practice It also identifies generic aspects of this practice and provides a theoretical foundation to these activities by reference to existing and emergent theories and concepts as well as to relevant management best practice The book is structured into four parts Part 1 Introduction Commercial Management in Project Environments explores the nature of commercial practice within project oriented organisations at the buyer seller interface It presents a Commercial

Management framework which illustrates the multiple interactions and connections between the purchaser's procurement cycle and a supplier's bidding and implementation cycles. Additionally, it outlines the principle activities undertaken by the commercial function, identifies the skills and abilities that support these activities, and reviews the theories and concepts that underpin commercial practice. Finally, it identifies areas of commonality of practice with other functions found within project-oriented organisations, plus sources of potential conflict and misunderstanding.

Part 2: Elements of Commercial Theory and Practice covers commercial leadership, exploring strategy, risk and uncertainty management, financial decision making, and key legal issues.

Part 3: Approaches to Commercial Practice addresses best practice management and commercial and contracting strategies and tactics.

Part 4: Case Studies offers two extended case studies: Football Stadiums (the Millennium Stadium, Cardiff; the Emirates Stadium, Islington; and Wembley Stadium, London) and Heathrow Terminal 5. The book provides a one-stop shop to the many topics that underpin commercial management practice from both a demand (buy) side and a supply (sell) side perspective. It will help develop an understanding of the issues influencing commercial management, leadership, strategy, risk, financial, legal, best practice management, and commercial and contracting strategy and tactics. This book's companion website is at <http://www.wiley.com/go/lowecommercialmanagement> and offers invaluable resources for both students and lecturers: PowerPoint slides for lecturers on each chapter; sample exam questions for students to practice; weblinks to key journals and relevant professional bodies.

The International Compendium of Construction Contracts Phillip Greenham, Society of Construction Law Australia, 2021-05-10. This book examines how the most commonly used construction project contracts are applied in a range of countries around the world. The specific situation of each of the almost 40 countries studied is dealt with in a dedicated chapter, allowing for easy comparison between differing legal and commercial environments. Each chapter contextualizes the relevant contracts within the legal and commercial systems prevalent in a particular country and examines a number of common issues impacting construction projects around the world. This unique book will be an essential resource for construction law specialists around the world because of its focus on commonly used contracts and the contextualizing of these contracts into the legal and commercial environment of each studied country. All contributions are from practicing construction project lawyers, ensuring that the quality of the information and analysis is of the highest standard.
