5 pages | 1109 words

How does technology affect our lives?

The Digital World is a very mysterious place, yet we let it be a major influence on our lives. Although it can be beneficial it can also have some negative effects on our lives. Some beneficial effects of technology are Education and medicinal reasons. But there are also negative effects of technology which include obesity, diabetes, heart attacks, cancer and much more. As you can see technology is a big deal whether you look at the good side or the bad side. There are many beneficial effects of technology. For instance, Education it cuts down the use of paper and reduces the time it takes to search for something you need for your assignment. There are online textbooks, study guides, and many other resources that are available electronically. Medicine also utilizes technology very often. An example would be nanotechnology which helps our immune systems by repairing the tissue. There are also online doctors and medical websites that have simple diagnosis with some home remedies. Also, technology helps with connection. Sometimes people want to try contact their close loved ones due to the reason they don't get to see them often. Lastly, with sensors, such as metal detectors, can help detect problems or threats a lot quicker than normal. These I found to be a few good beneficial examples of technology. There are also many negative effects of technology. Did you know that sitting down for too long can be bad for you? Yeah well it can it can cause such things as obesity, diabetes, heart attacks, and even cancer things you do not want to have. Also, it can cause hearing loss. If you use earbuds this could cause tinnitus (ringing in the ears). Vision problems could also happen including eye strain, blurred vision, and dry eyes. Social skills: some kids once introduced to the media start to have a harder time talking to their less media driven friends due to the confidence that comes from being behind a screen. Lastly, neck strain: if you for instance look down to look at your phone then your head is no longer supported by your spine and then strains your neck muscles. This strain will also cause tension headaches. Sometimes our technology gets hacked or gets a virus. If you have a Facebook, Instagram, or Snapchat account you could be one of the unlucky ones that could be hacked. In the last year alone 110 million Americans got hacked. That's almost half of the adult population in the US. There is a lot of vital or confidential information that may be stolen when technology is hacked. Also, electronics could get a virus and then the whole system would have to reboot itself, or the hard drive could have to be replaced or erased to go back to normal. Technology has advanced a lot since it was first made. For instance, time and money is saved with some technological advancements. Also, instead of using insulin or other medications, Nanocomposite contact lenses are being used for treating diabetes. Neuroprosthetic chips are being used to prevent seizures and help...
