Administration and Scoring of the NEO-FFI-3

The NEO-FFI-3 is a 60-item version of the NEO-PI-3 that provides a brief, comprehensive measure of the five domains of personality. It consists of five 12-item scales that measure each domain. Information on specific facets within each domain is not provided, and the shortened scales are somewhat less reliable and valid than the full NEO-PI-3 domain scales. Separate versions are available for Form S and Form R and for adults and adolescents.

Administration

The NEO-FFI-3 may be administered individually or in groups. The testing environment should be comfortable and free of distractions and provide adequate lighting. A pencil and a flat surface, such as a desk or clipboard on which the respondent can write, are also needed for administration. If the respondent uses eyeglasses, the examiner should be sure that they are being used during testing. The examiner should engage the respondent in the task of completing the test to reduce the possibility of response sets or random responding to the items.

Directions

Provide each respondent with a NEO-FFI-3 Item Booklet and a pencil. Tell the respondent to read the instructions for completing the NEO-FFI-3, which are on the first page. After the instructions have been read and the respondent understands the nature of the task, tell him or her to turn to the second page of the Item Booklet and to provide the identifying information requested at the top of that page. If an identification number is to be used, provide the respondent with the number so he or she can enter it, or fill it in yourself.

If Form R is being used, the respondent should provide the name (or initials) of the person being rated. *It is the examiner's responsibility to ensure that the person being rated can be correctly identified by name, initials, ID number, and/or the name of the rater.* The examiner is also responsible for ensuring that all identifying information is properly marked on the Item Booklet. Note that responses to the NEO-FFI-3 are made across the rows of the response grid.

There is no time limit for the NEO-FFI-3. Most respondents require 5 to 10 minutes to complete the measure, but older respondents and those with limited reading skills may take longer. The NEO-PI-3 alternative administration procedures previously described may also be used with the NEO-FFI-3.

Scoring

Missing Responses

Once the measure has been completed, examine the response area of the Item Booklet to be sure that a response has been given for each item. If unanswered items are found, the respondent should be asked to complete them. If a respondent is unsure of the meaning of an item or is unsure of how to respond, he or she may be told to use the *neutral* response option. It is also appropriate to explain the meaning of words the respondent does not understand (see chapter 3 of this Professional Manual for more information).

If the respondent did not provide a response to every item and the respondent is no longer available to the examiner, the examiner must determine whether the data may be validly scored and interpreted. If 10 or more items have been left blank, the test is considered invalid and should not be formally scored. If nine or fewer items have been left blank, the blank items should be scored as if the *neutral* response option was selected. Any domain for which there are more than four missing responses should be interpreted with caution.

Validity Checks

At the bottom of the third page of the NEO-FFI-3 Item Booklets, three yes-or-no items ask the respondent if he or she has (a) responded to all of the statements, (b) entered responses across the rows, and (c) responded accurately and honestly. In most cases, if the respondent indicated that responses were not entered in the correct boxes or were not answered honestly and accurately, the test should not be scored.
