Numbers Don't Lie Yago ás,2020-11 A typical NBA game can yield approximately 2 800 statistical events in thirty two different categories In Numbers Don t Lie Yago Col s started with a simple question How did basketball analytics get from counting one stat the final score to counting thousands He discovered that what we call basketball rules equipment fundamental skills techniques tactics strategies has changed dramatically since its invention and today encompasses many different forms of play from backyards and rec leagues to the NBA Finals Numbers Don t Lie explores the power of data to tell stories about ourselves and the world around us As advanced statistical methods and big data technologies transform sports we now have the power to count more things in greater detail than ever before These numbers tell us about the past present and future that shape how basketball is played on the floor decisions are made in front offices and the sport is marketed and consumed But what is the relationship between counting and what counts between quantification and value In Numbers Don t Lie Col s offers a three part history of counting in basketball First he recounts how big data basketball emerged in the past twenty years examines its current practices and analyzes how it presents itself to the public Col s then situates big data within the deeper social cultural and conceptual history of counting in basketball and beyond and proposes alternative frameworks of value with which we may take fuller stock of the impact of statistics on the sport Ultimately Col s challenges the putative objectivity of both quantification and academic writing by interweaving through this history a series of personal vignettes of life at the intersection of basketball counting and what counts *Resources in Education* ,1994-04
