Science Russell Kuhtz, 2016-12-09 *Soft Computing in Chemical and Physical Sciences* Kanchan Sarkar, Sankar Prasad Bhattacharyya, 2017-11-06 This book can be regarded as Soft computing for physicists and chemists self taught It prepares the readers with a solid background of soft computing and how to adapt soft computing techniques to problem solving in physical and chemical research Soft computing methods have been little explored by researchers in physical and chemical sciences primarily because of the absence of books that bridge the gap between the traditional computing paradigm pursued by researchers in science and the new soft computing paradigm that has emerged in computer science This book is the

interface between these primary sources and researchers in physics and chemistry , **Nanoscience** Mr. Rohit Manglik,2024-06-24 Introduces nanotechnology covering nanomaterials fabrication techniques and applications in electronics medicine and environmental science **Minerals in Africa** Francis Gudyanga,2020-08-10 Africa's dire need to industrialize is universally acknowledged and it is evident that the continent's vast mineral resources can catalyze that industrialization This requires the promotion of local beneficiation and value addition of minerals to yield materials on which modern Africa's industry and society can rely This book is therefore about transforming Africa's comparative advantages in minerals into the continent's competitive edge regarding materials Mineral beneficiation and value addition form the basis and provide opportunities for mineral driven Africa's industrialization The scope of the book is three fold with inter connected relationships Information Technical and Policy oriented It will be a useful reference material for mining undergraduate students on beneficiation and value addition of each of the minerals found in Africa The book while presenting a broad overview of beneficiation and value addition of Africa's minerals provides crucial starting material for postgraduate research students and R D institutions who wish to delve into more advanced methods of extraction and utilization of mineral derived materials that are in Africa for the purpose of industrialization of the continent Colorimetry Ashis Kumar Samanta,2022-07-20 This book presents a comprehensive overview of colorimetry and colorimetric analysis of dyes pigments paints pharmaceuticals and other products via spectrophotometric and spectroscopic analysis Chapters address such topics as UV VIS spectroscopy reflectance spectral analysis of colours colour science in the paint industry colouration of textiles for defence applications and much more Density Functional Theory Daniel Glossman-Mitnik,2019-01-30 Density Functional Theory or DFT for short is a potent methodology useful for calculating and understanding the molecular and electronic structure of atoms molecules clusters and solids Its use relies not only in the ability to calculate the molecular properties of the species of interest but also provides interesting concepts that allow a better comprehension of the chemical reactivity of the studied systems This book represents an attempt to present examples on the utility of DFT for the understanding of the chemical reactivity through descriptors that constitute the basis of the so called Conceptual DFT sometimes also named as Chemical Reactivity Theory as well as the application of the theory and its related computational procedures in the determination of the molecular properties of different systems of academic and industrial interest **The Physics of Protein Structure and Dynamics** Reinhard Schweitzer-Stenner,2024-09-23 The Physics of Protein Structure and Dynamics looks at various aspects of protein structure and dynamics from a physico chemical point of view It goes into some depth regarding the description of non covalent forces that determine the relative stability of folded and unfolded proteins Anharmonic protein dynamics involving motions between different minima of a rugged Gibbs energy landscape is described in great detail The book combines various aspects of the protein folding unfolding processes with an overview of intrinsically disordered proteins which have attracted considerable interest of the protein community over the last 25 years but are thus

far underrepresented in classroom oriented textbooks The book looks at protein folding and intrinsically disordered proteins as heavily interrelated topics that need to be viewed together Furthermore it presents some basic physico chemical aspects of protein peptide self assembly into nanoscale fibrils Intrinsically disordered peptides and proteins play a major role particularly in aggregation and self assembly processes that lead to various diseases Alzheimer Parkinson Huntington Mad Cow Therefore the relevance of protein disorder for protein self assembly deserves a closer look Protein self assembly cannot be separated from protein folding since it is frequently the product of misfolding With regard to modern theories the folding processes are linked to insights on protein dynamics and the discovered relationship between proteins and spin glasses The readers will benefit from being provided with an in depth overview of the physical concepts that govern different aspects of protein folding disorder and self assembly By emphasizing the relationship between these issues the approach adds a holistic character to the book The book is to a major extent mathematically based Mathematics is part of the language of physicists and physical chemists which cannot be properly substituted by words For instructors the book will offer a unique source for her his teaching of current protein physics issues The way how the book will be constructed multiple references to primary literature with DOI links literature based problem sets and topics for discussion will facilitate a learning process suitable for research oriented students Problem solving frequently requires the writing of short computer programs something that is underemphasized in chemistry and biochemistry education with the exception of computationally trained students of course
