teaching chemical thermodynamics Starting with a set of basic simple assumptions about what constitutes topics such as an ideal gas theories are developed in a clear concise and accessible manner that will either answer or at the very least give an insight into a surprising range of scientific phenomena including energy heat temperature properties of gases time and quantum theory Assumes that the reader has essentially no knowledge of the subject Mathematics including calculus is kept to a relatively elementary level in order to obtain an understanding of this most important of subjects Provides the reader with a better understanding of how science works together with its limitations

**Surface Waves and Fluxes** G.L. Geernaert, W.J. Plant, 2013-11-11 During the Conference on Air Sea Interaction in January 1986 it was suggested to me by David Larner of Reidel Press that it may be timely for an updated compendium of air sea interaction theory to be organized developed and published Many new results were emerging at the time i e results from the MARSEN MAS EX MILDEX and TOWARD field projects among others were in the process of being reported and or published Further a series of new experiments such as FASINEX and HEXOS were soon to be conducted in which new strides in our knowledge of air sea fluxes would be made During the year following the discussions with David Larner it became apparent that many of the advances in air sea interaction theory during the 1970s and 1980s were associated with sponsor investments in satellite oceanography and in particular remote sensing research Since ocean surface remote sensing e g scatterometry and SAR requires intimate knowledge of ocean surface dynamics advances in remote sensing capabilities required coordinated research in air sea fluxes wave state scattering theory sensor design and data exploitation using environmental models Based on this interplay of disciplines it was decided that this book be devoted to air sea interaction and remote sensing as multi disciplinary activities
