*Global Perspective on Issues and Trends in Educational Translanguaging* Bautista, Jude Cañero, Kim, Jean, 2025-05-29 The growing superdiversity around the world now appears to be the norm In traditional English speaking inner circle nations it is becoming increasingly rare to find classrooms with students who come from monocultural and monolingual backgrounds However teaching practices remain based on Anglocentric standards and perspectives even when most of the English speakers in the world are no longer just the monolingual speakers of the language Research in bilingualism and multilingualism reverberate the potential of translanguaging as a pedagogical practice This is to leverage all the linguistic cultural and semiotic resources of learners so that they can actively engage in the language literacy and content area learning processes in the classroom However even though it has gained ground in theory and research it has not been upheld in instructional practice especially in the Anglophone nations While some regions view translanguaging as a pathway to educational justice others face barriers such as limited resources administrative constraints or lack of teacher training Despite its promise concerns remain around the selective use of languages and the risk of reinforcing existing linguistic hierarchies

*Global Perspective on Issues and Trends in Educational Translanguaging* explores translanguaging pedagogies from both monolingual English speaking contexts and multilingual and multicultural contexts It examines a monolingual multilingual pairing of theoretical research and practical perspectives from around the world assessing how translanguaging pedagogies are practiced and researched worldwide This book covers topics such as indigenous studies migrant learners and pedagogy and is a useful resource for educators language experts academicians researchers and scientists

*Innovations and Technologies in Science/STEM Education: Opportunities, Challenges and Sustainable Practices* Wang-Kin Chiu, Hon-Ming Lam, Morris Siu Yung Jong, 2024-04-01 In our digital era harnessing innovations and emerging

technologies to support teaching and learning has been an important research area in the field of education around the world. In science STEM education technologies can be leveraged to present and visualize scientific theories and concepts effectively while the development of pedagogic innovations usually requires collective interdisciplinary research efforts. In addition, emerging technologies can better support teachers to assess students' learning performance in STEM subjects and offer students viable virtual environments to facilitate laboratory-based learning, thereby contributing to sustainable development in both K-12 and higher education.

**The History of Physics in Cuba** Angelo Baracca, Jürgen Renn, Helge

Wendt, 2014-04-22 This book brings together a broad spectrum of authors both from inside and from outside Cuba who describe the development of Cuba's scientific system from the colonial period to the present. It is a unique documentation of the self-organizing power of a local scientific community engaged in scientific research on an international level. The first part includes several contributions that reconstruct the different stages of the history of physics in Cuba from its beginnings in the late colonial era to the present. The second part comprises testimonies of Cuban physicists who offer lively insights from the perspective of the actors themselves. The third part presents a series of testimonies by foreign physicists, some of whom were directly involved in developing Cuban physics, in particular in the development of teaching and research activities in the early years of the Escuela de Física. The fourth part of the volume deals with some of the issues surrounding the publishing of scientific research in Cuba. Cuba's recent history and current situation are very controversial issues. Little is known about the development and status of higher education and scientific research on the island. However, Cuba has one of the highest proportions in the world of people with a university degree or doctorate and is known for its highly developed medical system. This book focuses on a comprehensive overview of the history of the development of one specific scientific discipline, physics, in Cuba. It traces the evolution of an advanced research system in a developing country and shows a striking capacity to link the development of modern research with the concrete needs of the country and its population. A little-known aspect is the active participation of several western physicists and technicians during the 1960s, the role of summer schools organized by French, Italian, and other western physicists, as well as the active collaboration with European universities.

**Re-envisioning English-Medium Instruction in K-12 Schools** Michelle Mingyue Gu, Yiqi Liu, Corey Fanglei Huang, 2025-06-18 Connecting diverse theories and practices in English-medium instruction (EMI) implementation, this book provides a comprehensive and systematic overview of EMI in K-12 settings in the Asian and European contexts. It addresses a wide range of ongoing challenges faced by many EMI policymakers and teachers and offers potential solutions or coping strategies. While it focuses on the contexts of Asia and Europe, the book can also provide inspirations or suggestions for researching and implementing EMI in other geographical or cultural contexts such as Africa. In brief, this book aims to 1. discuss up-to-date theories on EMI from different fields of research, including language policy studies, applied linguistics, and CLIL research; 2. provide detailed and critical reviews of EMI policies in K-12 education in the broad Asian and European

contexts 3 report empirical classroom based research on EMI implementation in these contexts and compare findings with those of the previous research 4 engage different researchers and scholars from relevant fields in a dialogue about EMI related theories issues and challenges in these contexts and 5 serve as a hands on resource for educational practitioners who are interested in practicing EMI     Future of STEM education: Multiple perspectives from researchers Subramaniam Ramanathan, Ida Ah Chee Mok, 2023-03-28
