The following are represented by A, B and C:
 A) Amplitude, wavelength, wave length
 B) Crest, trough, wavelength
 C) Amplitude, wave length, pulse length
 D) Crest, trough, wavelength

[2 Marks]

1.5. The diagram below shows two points A and B on a wave.

Page 2 of 5

Physical Sciences – Paper 1 (Physical)

How many wavelengths separate point A and B?

- A) 1,25 B) 1 C) 1,5 D) 3

[2 Marks]

1.6. Devices are sometimes placed under the floor of a hotel lobby. This equipment sends the following wave...

- A) X-ray B) Infrared light C) Ultrasound D) Ultra violet light

[2 Marks]

1.7. The following are an example of electromagnetic waves.

- A) Microwaves, visible light, X-rays
 B) X-rays, visible light, microwaves
 C) Microwaves, X-rays, visible light

Physical Sciences – Paper 1 (Physical)

2.2. Identify TWO points in the graph at which the particles would be moving in the same direction.

[2 Marks]

2.3. Which point has the maximum displacement?

[1 Mark]

Calculate

2.4. The frequency of the wave produced

[2 Marks]

2.5. The wavelength of the wave produced

[1 Mark]

Physical Science Paper 1 March 2013

YCT Expert Team

Physical Science Paper 1 March 2013:

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants The Secure and the Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures Can Science Fix Climate Change? Mike Hulme, 2014-06-04 Climate change seems to be an insurmountable problem Political solutions have so far had little impact Some scientists are now advocating the so called Plan B a more direct way of reducing the rate of future warming by reflecting more sunlight back to space creating a thermostat in the sky In this book Mike Hulme argues against this kind of hubristic techno fix Drawing upon a distinguished career studying the science politics and ethics of climate change he shows why using science to fix the global climate is undesirable ungovernable and unattainable Science and technology should instead serve the more pragmatic goals of increasing societal resilience to weather risks improving regional air quality and driving forward an energy technology transition Seeking to reset the planet's thermostat is not the answer **This Changes Everything** Naomi Klein, 2015-08-04 Explains why the environmental crisis should lead to an abandonment of free market ideologies and current political systems arguing that a massive reduction of greenhouse emissions may offer a best chance for correcting problems **2021-22 UPPCS General Studies & C-SAT** YCT Expert Team, 2021-22 UPPCS General Studies C SAT Previous Solved Papers General Studies & CSAT YCT Expert Team, 2023 UPPCS Pre General Studies CSAT Solved Papers , **The End of Doom** Ronald Bailey, 2015-07-21 In the past five decades there have been many many forecasts of impending environmental doom They have universally been proven wrong Meanwhile those who have bet on human resourcefulness have almost always been correct In his widely praised book Ecoscam Ronald Bailey strongly countered environmentalist alarmism using facts to demonstrate just how wildly overstated many claims of impending ecological doom really were Now twenty years later the Reason Magazine science correspondent is back to assess the future of humanity and the global biosphere Bailey finds contrary to popular belief that many present ecological trends are quite positive Including Falling cancer incidence rates in the United States The likelihood of a declining world population by mid century The abundant return of agricultural land to nature as the world reaches peak farmland A proven link between increases in national wealth and reductions in air and water pollution Global warming is a problem but

the cost of clean energy could soon fall below that of fossil fuels In *The End of Doom* Bailey avoids polemics and offers a balanced fact based and ultimately hopeful perspective on our current environmental situation Now isn't that a breath of fresh air

What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes, 2015 Today about 98 percent of scientists affirm that climate change is human made and about 2 percent still question it Despite that overwhelming majority though about half the population of rich countries like ours choose to believe the 2 percent And paradoxically this large camp of deniers grows even larger as more and more alarming proof of climate change has cropped up over the last decades This disconnect has both climate scientists and activists scratching their heads growing anxious and responding usually by repeating more facts to win the argument But the more climate facts pile up the greater the resistance to them grows and the harder it becomes to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead Is humanity up to the task It is a catch 22 that starts says psychologist and climate expert Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples he shows how to retell the story of climate change and apply communication strategies more fit for the task Publisher's description

Routledge International Handbook of Sustainable Development Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered

Megacities and the Coast Mark Pelling, Sophie Blackburn, 2014-01-03 Based on a major international study this volume provides a synthesis of scientific knowledge on megacity urbanization on the coast environmental impacts risks and management choices including a focus on adaptation mitigation and disaster risk management It is the primary output of a major international scientific project sponsored by the International Geosphere Biosphere Programme the Land Ocean Interactions at the Coastal Zone programme of IHDP IGBP and others It brings

together the work of over 60 contributing authors and an international review board. It presents the international policy and academic community with an unbiased and high quality assessment of the state of the art in areas of social ecological systems interaction. One of its main messages is that while we know a great deal about megacities of more than ten million people and about urban processes and about coasts and their physical and ecological processes aquatic physical and atmospheric there is relatively little work that focusses primarily at points of intersection between large scale urbanization and the coast. The book responds to this gap by providing the first global synthesis of megacity and large urban region urbanization on the coast. Its focus is on environmental and development challenges climate change and disaster. It is interdisciplinary and brings together world recognised scientists including many IPCC lead authors on urban climate and atmosphere disaster risk management demography and coastal environments.

Georgetown Journal of International Affairs, Summer/Fall 2014 Medha Raj, Warren Ryan, 2014-09-08 This issue of the Georgetown Journal of International Affairs focuses on the topic of Destabilizing Demographics exploring the opportunities and challenges presented by dynamic population patterns and structures. Demographic shifts affect multiple facets of international affairs impacting economies modifying politics and reshaping the fabric of our societies. These changes could have catastrophic international consequences if ignored or evaded. This edition concludes with articles regarding decidedly twenty first century concerns communication integration and globalization. The Georgetown Journal of International Affairs is the official publication of the Edmund A Walsh School of Foreign Service at Georgetown University. Each issue of the journal provides readers with a diverse array of timely peer reviewed content penned by top policymakers business leaders and academic luminaries.

Changing Climate Politics Yael Wolinsky-Nahmias, 2014-02-25 Changing Climate Politics provides a comprehensive account of the current state of government action and political participation in the United States on the issue of climate change. Author Yael Wolinsky Nahmias evaluates the role of the federal government the courts states and cities in tackling the problems created by climate change offering an inclusive and balanced assessment of progress and challenges. The book further explores the growing role of civic society in climate action plans analyzing public opinion the U S climate movement policy making through ballot measures consumer action and the prospect of a social transformation toward a more sustainable society. This timely volume examines new approaches to policies and civic action on climate change addressing critical questions about the responsibilities and obligations of governments and citizens.

Responsible Conduct of Research Adil E. Shamoo, David B. Resnik, 2014-12-01 Since the early 2000s the field of Responsible Conduct of Research has become widely recognized as essential to scientific education investigation and training. At present research institutions with public funding are expected to have some minimal training and education in RCR for their graduate students fellows and trainees. These institutions also are expected to have a system in place for investigating and reporting misconduct in research or violations of regulations in research with human subjects or in their applications to federal agencies for funding. Public

scrutiny of the conduct of scientific researchers remains high Media reports of misconduct scandals biased research violations of human research ethics rules and moral controversies in research occur on a weekly basis Since the 2009 publication of the 2nd edition of Shamoo and Resnik's Responsible Conduct of Research there has been a vast expansion in the information knowledge methods and diagnosis of problems related to RCR and the multitude of ethical issues of human subject protections With the climate surrounding research conduct always shifting developments in the field make an updated edition a necessity All chapters have been revised and reflect the most current RCR landscape New or further developed topics include social responsibility and misconduct in social sciences climate change research authorship and peer review Updates include new information on research involving human subjects or vulnerable biological subjects as well as genetic research Just like in previous editions all chapters contain recent case studies and legal examples of various subjects

The Chemical News and Journal of Physical Science, 1902 **100 questions and answers for job interview**

Offshore Drilling Platforms PETROGAV INTERNATIONAL, This book offers you a brief but very involved look into the operations in the drilling of an oil gas wells that will help you to be prepared for job interview at oil gas companies From start to finish you'll see a general prognosis of the drilling process If you are new to the oil gas industry you'll enjoy having a leg up with the knowledge of these processes If you are a seasoned oil gas person you'll enjoy reading what you may or may not know in these pages This course provides a non technical overview of the phases operations and terminology used on offshore drilling platforms It is intended also for non drilling personnel who work in the offshore drilling exploration and production industry This includes marine and logistics personnel accounting administrative and support staff environmental professionals etc No prior experience or knowledge of drilling operations is required This course will provide participants a better understanding of the issues faced in all aspects of drilling operations with a particular focus on the unique aspects of offshore operations

Sea Level Variability and Change Ivan D. Haigh, Marta Marcos, Sönke Dangendorf, Francisco Calafat, 2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca Spain with a focus on sea level variability and change Over 120 sea level experts from around the world attended this workshop from a range of different disciplines The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issues All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones This E Book presents papers that came out of that workshop Overall these papers illustrate the multi disciplinary nature of sea level research cross cutting many fields of research including oceanography meteorology geology coastal morphodynamics engineering and the social economic aspects Collectively these articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts

across a wide range of time and space scales Enjoy reading them [Accelerating Climate Action Refocusing Policies through a Well-being Lens](#) OECD,2019-09-20 This report builds on the OECD Well being Framework and applies a new perspective that analyses synergies and trade offs between climate change mitigation and broader goals such as health education jobs as well as wider environmental quality and the resources needed to sustain our livelihoods through time This report takes an explicitly political economy approach to the low emissions transitions needed across five economic sectors electricity heavy industry residential surface transport and agriculture that are responsible for more than 60% of global greenhouse gas emissions *Climate Change 2014: Mitigation of Climate Change* Ottmar Edenhofer,2015-01-26 This latest Fifth Assessment Report of the IPCC will again form the standard reference for all those concerned with climate change and its consequences **Climate Change 2014: Mitigation of Climate Change** Intergovernmental Panel on Climate Change,2015-01-26 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy *Job interview questions and answers for employment on Offshore Oil & Gas Rigs* Petrogav International Oil & Gas Training Center,2020-07-01 The job interview is probably the most important step you will take in your job search journey Because it s always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry Since these questions are so common hiring managers will expect you to be able to answer them smoothly and without hesitation This eBook contains 289 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process This course covers aspects like HSE Process Mechanical Electrical and Instrumentation Control that will enable you to apply for any position in the Oil and Gas Industry
