Federal Register ,2012-06      How We Teach Science John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public      *Chemical News and Journal of Physical Science* ,1909      *The Chemical News and Journal of Physical Science* ,1904      **Dignity, Discourse, and Destiny** Darwin H. Stapleton,Donna Stapleton,2004 Childhood Harvard Oxford and marriage In the Navy Return to education Princeton The Woodrow Wilson Program years Swarthmore College at mid century Swarthmore looks for Courtney Inauguration The case for the liberal arts college Faculty There is strength in having a variety of sources of support funding the liberal arts tradition Networks of support and service behind the presidency Nature shaped to advantage preserving campus viability Student activism to care about social justice Two decades of student life at Swarthmore Personal things Administration of a college The final year Conclusion      **Scientists in the Classroom** J. Rudolph,2002-05-02 During the 1950s leading American scientists embarked on an unprecedented project to remake high school science education Dissatisfaction with the soft school curriculum of the time advocated by the professional education establishment and concern over the growing technological sophistication of the Soviet Union led government officials to encourage a handful of elite research scientists fresh from their World War II successes to revitalize the nations science curricula In *Scientists in the Classroom* John L Rudolph argues that the Cold War environment long neglected in the history of education literature is crucial to understanding both the reasons for the public acceptance of scientific authority in the field of education and the nature of the curriculum materials that were eventually produced Drawing on a wealth of previously untapped resources from government and university archives Rudolph focuses on the National Science Foundation supported curriculum projects initiated in 1956 What the historical record reveals according to Rudolph is that these materials were designed not just to improve American science education but to advance the professional interest of the American scientific community in the postwar period as well

Stratospheric Ozone and Man Frank A. Bower,2018-01-10 The book as originally conceived was to be limited to technical considerations but the scientific course of event has been so interwoven with non scientific but nevertheless related events the authors felt necessary to include an account of this situation Accordingly the book is divided into five sections entitled Stratospheric ozone Atmospheric processes influencing stratospheric ozone Does man influence stratospheric ozone Effects and research Public policy      **Science, History and Social Activism** Garland E. Allen,Roy M. MacLeod,2013-03-14 To earn a degree every doctoral candidate should go out to Harvard Square find an audience and explain his or her dissertation Everett Mendelsohn s worldly advice to successive generations of students whether apocryphal or real has for over forty years spoken both to the essence of his scholarship and to the role of the scholar Possibly no one has done more to establish

the history of the life sciences as a recognized university discipline in the United States and to inspire a critical concern for the ways in which science and technology operate as central features of Western society This book is both an act of homage and of commemoration to Professor Mendelsohn on his 70th birthday As befits its subject the work it presents is original comparative wide ranging and new Since 1960 Everett Mendelsohn has been identified with Harvard University and with its Department of the History of Science Those that know him as a teacher will also know him as a scholar In 1968 he began and after 30 years has just bequeathed to others the editorship of the Journal of the History of Biology among the earliest and one of the most important publications in its field At the same time he has been a pioneer in the social history and sociology of science He has formed particularly close working relationships with colleagues in Sweden and Germany as witnessed by his editorial presence in the Sociology of Science Yearbook

**The Pontecorvo Affair** Simone Turchetti, 2012-01-27 In the fall of 1950 newspapers around the world reported that the Italian born nuclear physicist Bruno Pontecorvo and his family had mysteriously disappeared while returning to Britain from a holiday trip Because Pontecorvo was known to be an expert working for the UK Atomic Energy Research Establishment this raised immediate concern for the safety of atomic secrets especially when it became known in the following months that he had defected to the Soviet Union Was Pontecorvo a spy Did he know and pass sensitive information about the bomb to Soviet experts At the time nuclear scientists security personnel Western government officials and journalists assessed the case but their efforts were inconclusive and speculations quickly turned to silence In the years since some have downplayed Pontecorvo's knowledge of atomic weaponry while others have claimed him as part of a spy ring that infiltrated the Manhattan Project The Pontecorvo Affair draws from newly disclosed sources to challenge previous attempts to solve the case offering a balanced and well documented account of Pontecorvo his activities and his possible motivations for defecting Along the way Simone Turchetti reconsiders the place of nuclear physics and nuclear physicists in the twentieth century and reveals that as the discipline's promise of military and industrial uses came to the fore so did the enforcement of new secrecy provisions on the few experts in the world specializing in its application

**Education Outlook** ,1894      Sessional Papers ... of the Legislative Assembly of the Province of Ontario ... Ontario.

Legislative Assembly,1878      We Could Not Fail Richard Paul,Steven Moss,2015-05-01 The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery discrimination and violence against African Americans Presidents John F Kennedy and Lyndon Johnson utilized the space program as an agent for social change using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty We Could Not Fail tells the inspiring largely unknown story of how shooting for the stars helped to overcome segregation on earth Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights They recount how these technicians mathematicians engineers and an astronaut candidate surmounted barriers to move in some cases literally from the cotton fields to the launching pad The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges patenting new inventions holding elective office and reviving and governing defunct towns Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration We Could Not Fail demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement      **Empires of the Sky** Alexander

Rose,2021-05-25 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky a story that ended with the fiery destruction of the Hindenburg Genius a definitive tale of an incredible time when mere mortals learned to fly Keith O'Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements And it was the airship not the airplane that led the way In the glittery 1920s the count's brilliant protégé Hugo Eckener achieved undreamed of feats of daring and skill including the extraordinary Round the World voyage of the Graf Zeppelin At a time when America's airplanes rickety deathtraps held together by glue screws and luck could barely make it from New York to Washington D C Eckener's airships serenely traversed oceans without a single crash fatality or injury What Charles Lindbergh almost died doing crossing the Atlantic in 1927 Eckener had effortlessly accomplished three years before the Spirit of St Louis even took off Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes Eckener built his masterwork the behemoth Hindenburg a marvel of design and engineering Determined to forge an airline empire under the new flagship Eckener met his match in Juan Trippe the ruthlessly ambitious king of Pan American Airways who believed his fleet of next generation planes would vanquish Eckener's coming airship

armada It was a fight only one man and one technology could win Countering each other's moves on the global chessboard each seeking to wrest the advantage from his rival the struggle for mastery of the air was a clash not only of technologies but of business diplomacy politics personalities and the two men's vastly different dreams of the future Empires of the Sky is the sweeping untold tale of the duel that transfixed the world and helped create our modern age
