 5329 EIC N A *Intermediate (field) (direct and General Support) and Depot Level Maintenance Manual*, 1992 *Design
 for a Cast-in-place Concrete Shelter* Jay R. Allgood, R. M. Webb, R. F. Swalley, 1962 The objective was to develop an
 economical arch shaped shelter utilizing pneumatically placed mortar as an alternate to existing standard types Criteria and
 plans for a 100 man shotcrete shelter are presented which will provide protection against an overpressure of 100 psi and
 concomitant effects from nuclear weapons Shotcrete is recommended because of the economic advantages gained from using
 a single lightweight form as opposed to the heavy double form required for conventionally placed concrete Effort was made
 to provide a balanced and versatile design which may be adapted to the specific needs of various commands Methods for the
 design of the basic structural components of the shelter are given including a method for estimating the relative
 displacement between the floor and the foundation when the structure is subjected to blast loading Simple yet adequate
 design procedures are given which are suitable for use in the design office **Ice Plant**, 1944 **Electrical Construction
