Chew,2025-02-18 Why did the stagflation of the 1970s the improbable combination of high unemployment and runaway inflation prove so painful and protracted What explains the U S stock market s remarkable forty year run of 12 percent average annual returns since then Why is Japan still mired in a decades long recession and the Chinese economy in a tailspin And what accounts for the resilience of U S stock and labor markets in the wake of the COVID 19 pandemic and in the face of the Fed s record interest rate hikes Donald H Chew Jr argues that answers to these questions lie in the principles and methods of modern corporate finance Ideas formulated and tested by finance scholars notably an efficient stock market in which prices reflect the long run values of public companies and a market for corporate control that exerts continuous pressure on management informed and spurred the investor driven capitalism that has created the world s most productive and valuable companies Drawing on his career long relationships with leading academics and practitioners Chew profiles key figures in the development of modern corporate finance while emphasizing their counterintuitive lessons for shareholders companies and countries Corporate efficiency and value creation he contends are the fundamental source of the social wealth essential to addressing challenges such as poverty and climate change Lively and provocative this book makes corporate finance approachable and even admirable for readers interested in how the success and failure of companies affect their lives

The North American West in the Twenty-First Century Brenden W. Rensink,2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner s frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome The North American West in the Twenty First Century edited by Brenden W Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal frontier between our unsettled past and uncertain future These forays into the twenty first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness **Disruptive Innovation in Business and Finance in the Digital World** J. crisis attitudes and practices in relation to intellectual property valuation are changing as exemplified by the dichotomy explained in this book which makes it unique While there has been a move towards global harmonisation in terms of valuation of both tangible and intangible assets that are based on innovation there is also a tendency against global harmonisation because of cultural attitudes and practices of different countries This can be seen most acutely in relation to intellectual property valuation in Asia especially East Asia which often differs from the West's perception of valuation The book is written by experts in intellectual property valuation and innovation who are mainly practitioners covering innovators marketers accountants social innovators and business and management academics The breadth and practitioner background of most of the contributors make the material relevant to those involved in valuation economics business management accounting and finance law and maritime insurance This book takes an interdisciplinary approach that cross cuts all the above mentioned disciplines and takes the understanding of intellectual property valuation to a new level
