Thompson, 2014-05-28 Although Juan Domingo Perón's central role in Argentine history and the need for an unbiased assessment of his impact on his nation's cinema are beyond dispute the existing scholarship on the subject is limited In recent decades Argentina has witnessed a revival of serious film study some of which has focused on the nation's classical movies and in one case on Peronism None of this work has been translated into English however This is the first English language book that offers an extensive assessment of Argentine cinema during first Peronism It is also the first study in any language that concentrates systematically on the evolution of social attitudes reflected in Argentine movies throughout those years and that assesses the period's impact on subsequent filmmaking activity By analyzing popular Argentine movies from this time through the prism of myth second order communication systems that present historically developed customs and attitudes as natural the book traces the filmic construction of gender criminality race the family sports and the military It identifies in movies the development and evolution of mindsets and attitudes that may be construed as Peronist By framing its consideration of films from the Perón years in the context of earlier and later ones it demonstrates that this period accelerates and sometimes registers backward looking responses to earlier progressive mythic shifts and it traces the development in the 1950s of a critical mindset that comes to fruition in the new cinema of the 1960s Picturing Argentina Myths Movies and the Peronist Vision is an important book for Latin American studies film studies and history collections Panorama José A. Analysis of Mexican Corn Prices in the Chicago Board of Trade Futures Market, period 2000-2016 Erika del Carmen González Huacuz, Jorge Víctor Alcaraz Vera, Rubén Chávez Rivera, 2025-04-09 This work outlines an analysis of the relationship between real prices of real production and prices resulting from speculation in the period 2000-2016. The specific agricultural commodity selected to carry out this study is Mexican yellow corn whose prices are analyzed based on the spot market on the real or physical goods market and on the results of speculation within the Chicago Board of Trade (CBOT) of the CME Group located in the United States of America. To achieve the above, a linear regression analysis using the ordinary least squares (OLS) method and time series data has been applied. We consider that this tool is the most appropriate to test the hypothesis planted based on currently available data. Among the main findings of the analysis is that the growing speculation in agricultural commodity markets in this case Mexican yellow corn brings with it a series of structural problems in the Mexican agricultural sector such as the agrifood crisis, the lack of food sovereignty and a highly speculative pricing process coming from abroad. In this sense, this work shows evidence of the need to put forward proposals in terms of public policy whose axis is DOI <https://doi.org/10.52501/cc.050>

Food and Revolution Christiane Berth, 2021-02-02 Food policy and practices varied widely in Nicaragua during the last decades of the twentieth century. In the 1970s and 80s, food scarcity contributed to the demise of the Somoza dictatorship and the Sandinista revolution. Although faced with widespread scarcity and political restrictions, Nicaraguan consumers still carved out spaces for defining their food choices. Despite economic crises, rationing and war limiting people's food selection, consumers responded with improvisation in daily cooking practices and organizing food exchanges through three distinct periods. First, the Somoza dictatorship (1936-1979) promoted culture and food practices from the United States which was an option only for a minority of citizens. Second, the 1979 Sandinista revolution tried to steer Nicaraguans away from mass consumption by introducing an austere, frugal consumption that favored local products. Third, the transition to democracy between 1988 and 1993, marked by extreme scarcity and economic crisis, witnessed the re-introduction of market mechanisms, mass advertising and imported goods. Despite the erosion of food policy during transition, the Nicaraguan revolution contributed to recognizing food security as a basic right and the rise of
