

## The American Progressive Era

America has seen a lot of changes since the time it was colonized. Some of the things that have changed include cultural values and technological advancements. These advancements have happened as a result of good leadership and progressive culture. Culture in this context would refer to the total way of life of individuals. It extends to all the modes of living that encompasses foods, dressing habits religion and all other aspects of life.

Looking at details, America has been mentioned as the third largest nation in the world with almost 320 million people. This is according to its census values. With this great population, America has comprised of many immigrants moving into the country. The increasing number of immigrants in the country has changed a number of things in the country. This paper will examine the various changes that have happened between the progressive eras in America as from 1906 to 1920.

Major changes that have happened and seen the advancement of America happened during the progressive era (1906-1920). The Washington's post cartoon writings of 1907 was one of the contributions. This characterized various images of presidents of the country and the progressive changes they had made in the country. With an effort to evaluate the presidency effectiveness in the progressive era and the reforms they brought, Neil Reynolds report of 1906 was written. This was to expose the advancements that presidents brought.

One of the changes that happened is the advancements in agriculture that saw a regulation in the food sector that brought a meat inspection program. This was in response to the publication of Upton Sinclair's act the jungle. This meat inspection act stated that no meat would be allowed for consumption without being inspected. This had followed the exposition of Chicago meat. The progressive era was so vibrant that every sector in the country economy was being reviewed.

An important review was brought by Jane Addams who was a feminist. Having fought in the American civil war as a soldier, Jane came up with ideas that saw provision of advanced care for the women and children. This continued efforts saw the development of the Hull house which took care of more than 2000 people within a period of two weeks.

This was followed by the Roosevelt speech of 1912 after being elected as the president. It simply focused on all the transformative American democracy. Americans had realized the need to vote wisely
