

Can Medication Cure Obesity in Children?

A Review of the Literature

In March 2004, U.S. Surgeon General Richard Carmona called attention to a health problem in the United States that, until recently, has been overlooked: childhood obesity. Carmona said that the “astounding” 15% child obesity rate constitutes an “epidemic.” Since the early 1980s, that rate has “doubled in children and tripled in adolescents.” Now more than 9 million children are classified as obese (paras. 3, 6).¹ While the traditional response to a medical epidemic is to hunt for a vaccine or a cure-all pill, childhood obesity has proven more elusive. The lack of success of recent initiatives suggests that medication might not be the answer for the escalating problem. This literature review considers whether the use of medication is a promising approach for solving the childhood obesity problem by responding to the following questions:

1. What are the implications of childhood obesity?
2. Is medication effective at treating childhood obesity?
3. Is medication safe for children?
4. Is medication the best solution?

Understanding the limitations of medical treatments for children highlights the complexity of the childhood obesity

¹Obesity is measured in terms of body-mass index (BMI): weight in kilograms divided by square of height in meters. An adult with a BMI 30 or higher is considered obese. In children and adolescents, obesity is defined in relation to others of the same age and gender. An adolescent with a BMI in the 95th percentile for his or her age and gender is considered obese.

Full title, continued.

The writer sets up her organization by posing four questions.

The writer states her thesis.

The writer uses a footnote to define an essential term that would be cumbersome to define within the text.

A Systematic Guide to Write a Research Paper , Research Paper Writing Guide for Criminal Justice and Forensic Investigation Scholars Michael Kane, 2015-06-10 This book contains the necessary information for college students to write successful research papers. Most research textbooks stop short at describing the step-by-step process of building and presenting research papers. This book does not. The textbook's design walks students through the logical process of building research papers and presenting research findings both orally and in writing. Topics include APA Writing Guide and Paper Requirements, The Purpose Statement, Citing in APA Style, What is a Scholarly Journal, The Literature Review, Critical Thinking, Analysis, Synthesis, and Evaluation, The Oral Presentation, Completing the Paper. The textbook serves as a primary textbook for courses involving research methods and paper writing or serves as an effective supplement to courses with major research paper components. The textbook contains several practical exercises and helpful tables as well.

The International Student's Guide to Writing a Research Paper Janine Carlock, Maeve Eberhardt, Jaime Horst, Peter Kolenich, 2017-06-13 The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* by Lionel Menasche (1998) and partly a companion to *The ESL Writer's Handbook*. Each section of the book includes a discrete task called a Building Block, which requires students to apply the skills learned toward the development of their own paper. This step-by-step approach allows students to construct knowledge as they become more familiar with the process, making writing a research paper a less intimidating task.

Special features: This guide uses simple, direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first-year writing class, including two sample papers: one in APA and one in MLA. A section on responding to instructor feedback provides students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.
