Perspectives on Multigrade Teaching Linley Cornish,Matshidiso Joyce Taole,2021-10-25 This book contains the results of research projects carried out in relation to multigrade teaching in Australia and South Africa Research in multigrade contexts is not commonly reported and rarely in book form The research results have implications for multigrade teachers government education personnel and university teacher educators The book also contains chapters with practical advice for multigrade teachers including examples of multigrade teaching used in an Australian seven grade class kindergarten to grade 6 Other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades Very little is published in the area of multigrade teaching yet the number of multigrade schools worldwide is huge Developed countries still have a significant proportion of multigrade schools commonly one fifth to one third of all primary schools or classes Despite decades of centralisation of schools and expansion of transport networks the number of these schools remains high mostly in rural areas Developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development Goal of Universal Primary Education

Yet specific training to teach a multigrade class remains virtually non-existent in initial teacher education programs worldwide. The value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers. This help is needed as the teachers strive to achieve the UN Sustainable Development Goal of a quality education through helping their students develop the skills and behaviours required for 21st-century learning.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23. Children are already learning at birth and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health, development and learning. Despite the fact that they share the same objective to nurture young children and secure their future success, the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems, and workforce development and research to

continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children
