Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh s first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school

Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

NATO's Return to Europe Rebecca R. Moore, Damon Coletta, 2017-09-11 NATO's 2010 Strategic Concept officially broadened the alliance's mission beyond collective defense reflecting a peaceful Europe and changes in alliance activities NATO had become an international security facilitator a crisis manager even outside Europe and a liberal democratic club as much as a mutual defense organization However Russia's re entry into great power politics has changed NATO's strategic calculus Russia's aggressive annexation of Crimea in 2014 and its ongoing military support for Ukrainian separatists dramatically altered the strategic environment and called into question the liberal European security order States bordering Russia many of which are now NATO members are worried and the alliance is divided over assessments of Russia's behavior Against the backdrop of Russia's new assertiveness an international group of scholars examines a broad range of

issues in the interest of not only explaining recent alliance developments but also making recommendations about critical choices confronting the NATO allies While a renewed emphasis on collective defense is clearly a priority this volume s contributors caution against an overcorrection which would leave the alliance too inwardly focused play into Russia s hand and exacerbate regional fault lines always just below the surface at NATO This volume places rapid fire events in theoretical perspective and will be useful to foreign policy students scholars and practitioners alike **Just Like Me, Climbing a Tree**

Durga Yael Bernhard,2015-04-22 Join us on a trip around the world climbing the different trees we find along the way How would it feel to be up in a GINGKO tree in CHINA Could you climb a CYPRESS tree in MEXICO What would you find in a baobab tree in AFRICA Large and small common and incredible trees are a never ending source of wonder No matter what continent you live on there is a grand adventure waiting for you right in your own neighborhood Includes fascinating information about all the trees featured in the book *Annual Report* India. Ministry of Finance,2014 **Dark Data** David J. Hand,2022-02-15 Data describe and represent the world However no matter how big they may be data sets don t indeed cannot capture everything Data are measurements and as such they represent only what has been measured They don t necessarily capture all the information that is relevant to the questions we may want to ask If we do not take into account what may be missing unknown in the data we have we may find ourselves unwittingly asking questions that our data cannot actually address come to mistaken conclusions and make disastrous decisions In this book David Hand looks at the ubiquitous phenomenon of missing data He calls this dark data making a comparison to dark matter i e matter in the universe that we know is there but which is invisible to direct measurement He reveals how we can detect when data is missing the types of settings in which missing data are likely to be found and what to do about it It can arise for many reasons which themselves may not be obvious for example asymmetric information in wars time delays in financial trading dropouts in clinical trials deliberate selection to enhance apparent performance in hospitals policing and schools etc What becomes clear is that measuring and collecting more and more data big data will not necessarily lead us to better understanding or to better decisions We need to be vigilant to what is missing or unknown in our data so that we can try to control for it How do we do that We can be alert to the causes of dark data design better data collection strategies that sidestep some of these causes and we can ask better questions of our data which will lead us to deeper insights and better decisions Performance Costume Sofia Pantouvaki,Peter McNeil,2020-12-10 Costume is an active agent for performance making it is a material object that embodies ideas shaped through collaborative creative work A new focus in recent years on research in the area of costume has connected this practice in vital and new ways with theories of the body and embodiment design practices artistic and other forms of collaboration Costume like fashion and dress is now viewed as an area of dynamic social significance and not simply as passive reflector of a pre conceived social state or practice This book offers new approaches to the study of costume as well as fresh insights into the better understood frames of historical theoretical

practice based and archival research into costume for performance This anthology draws on the experience of a global group of established researchers as well as emerging voices Below is a list of just some of the things it achieves 1 Introduces diverse perspectives innovative new research methods and approaches for researching design and the costumed body in performance 2 Contributes towards a new understanding of how costume actually performs in time and space 3 Offers new insights into existing practices as well as creating a space of connection between practitioners and researchers from design the humanities and social sciences

Balloon and Stent for Ischemic and Hemorrhagic Stroke: A New Trend for Stroke Prevention and Management

Firas Al-Ali,2015-11-09 In recent years intracranial endovascular use of Balloon and Stent has grown significantly This issue will focus primarily on recent advances in the use of these methods today This discussion will also highlight our improvements in understanding the disease process and not only relying on devices to treat a patient Wide necked intracranial aneurysms IA were originally thought to be either untreatable or at the very least significantly challenging to treat by endovascular means due to the risk of coil protrusion and possibly parent vessel occlusion However this view now outdated today and we will discuss the significant advancement in different flow diverters The treatment of post sub arachnoid hemorrhage vasospasm is mature now as this issue will highlight In addition Intracranial atherosclerosis is still a prominent cause of stroke in various populations worldwide This issue will summarize the challenges of risk factor modification and secondary stroke prevention by defining optimal methods We will try to outline a new approach for intracranial angioplasty and stenting for stroke prevention Finally despite recent impressive increase recanalization rates in acute ischemic stroke treatment the clinical improvement rate has remained relatively stable This article will discuss a new means of improving patient selections using the capillary index score CIS The future of our specialty relies heavily on better devices and on a deeper understanding of the disease process The future is bright and we have already taken the first successful steps
