**Effectiveness of teachers' guides in the Global South** Benjamin Piper,Yasmin Sitabkhan,Jessica Mejia,Kellie Betts,2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

**Globalizing Educational Accountabilities** Bob Lingard,Wayne Martino,Goli Rezai-Rashti,Sam Sellar,2015-07-30 Globalizing Educational Accountabilities analyzes the

influence that international and national testing and accountability regimes have on educational policy reform efforts in schooling systems around the world Tracing the evolution of those regimes with an emphasis on the OECD's PISA it reveals the multiple effects of policy as numbers in countries with different types of government and different education systems From the effect of Shanghai's PISA success on nations trying to compete economically to the perverse effects of linking funding to performance targets in Australia the analysis links testing and accountability to new modes of network governance new spatialities and the significance of data infrastructures This highly illustrative text offers scholars and policy makers a critical policy sociology framework for doing education policy analysis today

**Must Inclusion be Special?** Jonathan Rix, 2015-06-05 *Must Inclusion be Special* examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs The author examines the political medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development This examination leads to a problematisation of mainstream education provision our understanding of why social inequities emerge and how additional support can overcome these inequities Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive outlining an alternative approach based upon a community of provision This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all But it also assumes that we tend towards diffuse practices services policies settings and roles spread across provision which is variously inclusive and exclusionary In seeking to create equitable participation for all support needs to shift its focus from the individual to this diffuse network of contexts *Must Inclusion be Special* emerges from the research base which problematises inclusion and special education drawing upon examples from many countries It also refers to the author's research into pedagogy language and policy and his experiences as a teacher and the parent of a child identified with special educational needs

**Writing, Redefined** Shawna Coppola, 2023-10-10 What does it mean to write or to be a writer In Shawna Coppola's book Writing Redefined Broadening Our Ideas of What It Means to Compose she challenges the reader to expand beyond standard alphabetic writing and consider alternative forms of composition when assigning writing to students This book empowers teachers to change what counts as writing in schools and classrooms opening the door to students who may not consider themselves to be writers but should and can Inside you'll find alternative engaging writing assignments that are visual aural or multimodal that will involve all students specifically those Who prefer to compose using a wider array of forms and modes For whom standard English is not the norm Who have been identified as dyslexic Whose cultural traditions lean heavily towards more aural forms of composition Who are considered struggling writers By finding ways to accommodate all styles of writers students are free to unleash their creativity and share their story with others While there is no question composition in written form is important and worth of study broadening our definition of writing expands an enormous range of possibilities for composing for all students

**An Age of Accountability** John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

**Frontiers in the Acquisition of Literacy** Claire M. Fletcher-Flinn, 2015-09-28 Learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language We are not born with an innate ability to read A reading system of mental representations that enables us to read must be formed in the brain Learning to read in

alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language Although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same Spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research

**Changing the Course of Failure** Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven t done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students
