Towards Good Order at Sea Thomas Mandrup, Francois Vre~, 2015-03-01 The problems originating from the resultant bad order at sea can be directly felt on land when smuggling terrorism and related criminal activities operate more or less unhindered The book provides an important mapping of the challenges preventing good order at sea off the African coast and East Africa in particular Rear Admiral N Wang Commandant Royal Danish Defence College **Private Anti-Piracy Navies**

John J. Pitney Jr., John-Clark Levin, 2013-12-12 The twenty first century has seen a sharp rise in privatization of the military especially of logistics and security functions during the U S led wars in Iraq and Afghanistan The outbreak of Somali piracy that started in 2008 has prompted a similar revolution in maritime security Private security companies began operating armed escort vessels to protect merchant shipping against pirates off the Horn of Africa Private Anti Piracy Navies is intended to provide a contextualized understanding of the historical origins current state and future prospects of this fast changing sector Centuries ago the British East India Company used a private navy against piracy in the same waters with much success Yet since then international law has evolved to more tightly regulate the use of force by civilians and to afford greater protections to suspected pirates Thus the development of what are in effect private warships has presented numerous legal and regulatory problems How can the companies that operate these vessels be effectively licensed Under what circumstances should they be allowed to use lethal force This book explains how regulators in industry and government have attempted to answer such questions and highlights the remaining areas of uncertainty It also addresses the economic factors that drive the struggle between pirates and anti piracy forces Of equal concern are operational considerations such as defensive tactics logistics and rules of engagement Security companies must carefully balance rights concerns against the need to defend ships effectively Partly due to the contribution of private security piracy in the Indian Ocean has dropped significantly over the past two years leading to widespread overconfidence Governments under severe budget pressure may withdraw their naval task forces from the region prematurely leading to a resurgence of Somali piracy At the same time pirates are wreaking havoc in the Gulf of Guinea off West Africa The book concludes with an assessment of private naval forces prospects in these conflicts over the short term as well as the implications for wider naval privatization in the long run

**New Dynamics in US-China Relations** Mingjiang Li, Kalyan M. Kemburi, 2014-10-17 Washington s strategic pivot to Asia and Beijing s pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies as well as to play the leading role in maintaining peace and stability in the region However Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states Given the centrality of the two powers to the strategic stability and economic development of the region these new dynamics in US China relations must be properly understood and appropriately handled This book examines the growing

Sino US strategic rivalry in the Asia Pacific alongside the strategies employed in the management of this relationship In turn it illuminates the sources of conflict and cooperation in US China relations looking specifically at maritime disputes economic relations energy security non traditional security defence and strategic forces and Taiwan Finally it explores the role of regional states in shaping US China relations and in doing so covers the influence of Japan India the Korean Peninsula the Philippines Vietnam Myanmar and Cambodia With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry expanding regional trade relations non traditional security issues the role of energy security maritime security and how Asian states view their relations with the US and China respectively New Dynamics in US China Relations will be of huge interest to students and scholars of Asian politics US politics international relation and security studies as well as practitioners involved in framing and implementing foreign security and economic policy pertaining to the Asia Pacific

**Bihar and Mithila** J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates

The Rise of Big Data Policing Andrew G. Ferguson, 2017-10-03 Winner 2018 Law Legal Studies PROSE Award The consequences of big data and algorithm driven policing and its impact on law enforcement In a high tech command center in downtown Los Angeles a digital map lights up with 911 calls television monitors track breaking news stories surveillance cameras sweep the streets and rows of networked computers link analysts and police officers to a wealth of law enforcement intelligence This is just a glimpse into a future where software predicts future crimes algorithms generate virtual most wanted lists and databanks collect personal and

biometric information The Rise of Big Data Policing introduces the cutting edge technology that is changing how the police do their jobs and shows why it is more important than ever that citizens understand the far reaching consequences of big data surveillance as a law enforcement tool Andrew Guthrie Ferguson reveals how these new technologies viewed as race neutral and objective have been eagerly adopted by police departments hoping to distance themselves from claims of racial bias and unconstitutional practices After a series of high profile police shootings and federal investigations into systemic police misconduct and in an era of law enforcement budget cutbacks data driven policing has been billed as a way to turn the page on racial bias But behind the data are real people and difficult questions remain about racial discrimination and the potential to distort constitutional protections In this first book on big data policing Ferguson offers an examination of how new technologies will alter the who where when and how we police These new technologies also offer data driven methods to improve police accountability and to remedy the underlying socio economic risk factors that encourage crime The Rise of Big Data Policing is a must read for anyone concerned with how technology will revolutionize law enforcement and its potential threat to the security privacy and constitutional rights of citizens Read an excerpt and interview with Andrew Guthrie Ferguson in The Economist
