2.1 Read the passage below and answer the questions that follow.

Peat lands are special wetlands that play a very important role in ecology. A peat land, of approximately 5 000 years old, near Mufurang is almost destroyed because of excessive extraction of water from the nearby Malopo river. The water is extracted for human consumption.

Peat lands like the one near Malling is exceptional and play an important role in storing water as well as preventing climate changes.

Dr. Pat-Louis Drunding said that carbon that is "held" or "stored" by peat lands combats climate change because it decreases the amount of carbon in the atmosphere.

Peat lands trap about one third of the world's carbon. Approximately 50% of wetlands worldwide are peat lands. However in South Africa about 10% of the wetlands are peat lands.

Grundling explained that peat lands can hold about 1 000 times its own mass in water. This replenishes the water table and is the source that keeps streams flowing. The "sponge effect" of the peat also makes it possible to store water that is then released during the seasons.

Dr. Grunwald said that it might be too late to restore the peat land near Malling, but it might be possible to restore some parts of it if more water is supplied to this peat land.

The result of this destruction is depletion of the water table. The habitat of numerous fish and bird species that lived in the canal bed was also destroyed.

Walter Isaacson, Sarah Durand, 2023-03-28 When Jennifer Doudna was a sixth grader in Hilo Hawaii she came home from school one afternoon and found a book that would spark her curiosity in science It was The Double Helix James Watson s account of how he and Francis Crick had discovered the structure of DNA the spiral staircase molecule that carries the genetic instruction code for all forms of life When the time came Doudna focused her studies on what seemed to take a backseat in biochemistry figuring out the structure of RNA a closely related molecule that enables the genetic instructions coded in DNA to express themselves Doudna s expertise led her and her collaborators to develop a revolutionary technique that could actually edit human genes Today gene editing technologies such as CRISPR are already being used to eliminate simple genetic defects that cause disorders such as Tay Sachs disease and sickle cell anemia For now however Doudna and her team are lining up against our most immediate threat the coronavirus and you have just been given a front row seat to that race **The Fuzzy and the Techie** Scott Hartley, 2017-04-25 Artfully explains why it is time for us to get over the false division between the human and the technical Tim Brown CEO of IDEO and author of Change by Design Scott Hartley first heard the terms fuzzy and techie while studying political science at Stanford University If you majored in humanities or social

sciences you were a fuzzy If you majored in computer or hard sciences you were a techie While Silicon Valley is generally considered a techie stronghold the founders of companies like Airbnb Pinterest Slack LinkedIn PayPal Stitch Fix Reddit and others are all fuzzies in other words people with backgrounds in the liberal arts In this brilliantly counterintuitive book Hartley shatters assumptions about business and education today learning to code is not enough The soft skills curiosity communication and collaboration along with an understanding of psychology and society s gravest problems are central to why technology has value Fuzzies are the instrumental stewards of robots artificial intelligence and machine learning They offer a human touch that is of equal if not greater importance in our technology led world than what most techies can provide For anyone doubting whether a well rounded liberal arts education is practical in today s world Hartley s work will come as an inspiring revelation Finalist for the 2016 Financial Times McKinsey Bracken Bower Prize and A Financial Times Business Book of the Month

**The Routledge Handbook of Biopolitics** Sergei Prozorov, Simona Rentea, 2016-08-05 The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault's genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e.g. the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico-philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise

the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to more advanced audiences interested in the current state of the art in biopolitics studies

### **Climate Benefits of Material Recycling**

Hillman, Karl,Damgaard, Anders,Eriksson, Ola,Jonsson, Daniel,Fluck, Lena,2015-07-06 The purpose of this project is to compare emissions of greenhouse gases from material recycling with those from virgin material production both from a material supply perspective and from a recycling system perspective The method for estimating emissions and climate benefits is based on a review followed by a selection of the most relevant publications on life cycle assessment LCA of materials for use in Denmark Norway and Sweden The proposed averages show that emissions from material recycling are lower in both perspectives comparing either material supply or complete recycling systems The results can be used by companies and industry associations in Denmark Norway and Sweden to communicate the current climate benefits of material recycling in general They may also contribute to discussions on a societal level as long as their average and historic nature is recognised

*Contemporary Global Perspectives on Gender Economics* Moore, Susanne,2015-07-24 The rise of women in the workforce has led to many campaigns for wage equality and the impartial treatment of both sexes as they pursue careers previously designated as either a man s or a woman s job The impact of these campaigns has been felt but a sense of gender stereotyping still affects not only the social and cultural well being of the modern organization but the drive for innovation and economic success as well Contemporary Global Perspectives on Gender Economics challenges current economic theory targeting the way gender is often used for economic gain or increased market share Experts realize that company growth can no longer be achieved by taking a conventional approach but few follow through with introducing new frameworks that change the way diversity is treated By acknowledging that issues like childcare and the wage gap are not only a woman s challenge this book speaks to legislators and policymakers economic developers corporate practitioners educational faculties and students of all disciplines who are looking to change the way gender is viewed in the workforce This essential reference source features chapters that combine the concepts of gender theory sociology and economics and cover topics including economic equality gender bias the history of gender economics industrial creativity and the impact of social connectedness on life satisfaction
