## Role Model Essay

This paper example uncovers the main arguments and facts regarding Role Model. Find out about Role Model in this paper.

Many of us have role models in our lives and to most people role models are athletes and movie stars, but to me a role model is much more. To me a role model is a person who has positively influenced someone in life, and is not a person filled with selfishness and greed. They help shape someone's personality, and characteristics. They are people who someone can look up to for advice in a hard situation, and know that they will give those words of wisdom. They will never judge our past actions, instead only look to help because they really care.

A role model is someone who we should never feel awkward talking to about our problems. A perfect role model for me is my mother. She is a wonderful human being. She's smart, wise, ambitious, patient and such a loving person. There are no words that can describe my gratitude towards her, but through this essay I will describe some of her characteristics that makes her my role model. To begin with, I would like to describe my mom's ambition. Life was not easy with her, my father died when my bother was six years old and I was two. She was a single mother of two children and the head of the family.

### Sample Essay on Role Model

My mom has worked really hard to give my brother and I the lifestyle we had. For example on my birthday she saved money for a month to do my birthday party and, she never missed one. My mom's ambition to succeed in life has allowed her to grow into a wonderful person full of kindness and knowledge. Ambition is a great virtue to have, and that is one reason why my mother is my role model.

My mother is a hard worker, she never complains about her life also, she always gets what she wants. If I ever need my mom's advice or help she will be always there for me even today. My mother is a wise, smart and educated person, she has not any masters degree and for me she's an example of what intelligent person should be like. Sometimes she comes home tired from work, and she still makes time for her family. She makes sure that we have done our homework and is always making sure we have everything that we need. I learned from my mother that if I work hard, I w

facilitating the composition of new design processes Following this standardization approach this book gathers the documentations of some of the best known agent oriented design processes After an introductory section describing the goal of the book and the existing IEEE FIPA standard for design process documentation thirteen processes including the widely known Open UP the de facto standard in object oriented software engineering are documented by their original creators or other well known scientists working in the field As a result this is the first work to adopt a standard unified descriptive approach for documenting different processes making it much easier to study the individual processes to rigorously compare them and to apply them in industrial projects While there are a few books on the market describing the individual agent oriented design processes none of them presents all the processes let alone in the same format With this handbook for the first time researchers as well as professional software developers looking for an overview as well as for detailed and standardized descriptions of design processes will find a comprehensive presentation of the most important agent oriented design processes which will be an invaluable resource when developing solutions in various application areas Advances in Software Engineering, Education, and e-Learning Hamid R.
