Core Values

Ethical framework is referred to as a system of words an individual may use to conduct his or her behavior. This type of framework may use ethics to show how individuals are able to differentiate right from wrong in a particular way communicated within the world. Ethical moral framework becomes established by an individual's moral judgment on what he or she believes to be the best possible solution in a specific case.

This allows moral values to be developed to help shape behavior, learn respect, and improve relationships with other human beings surrounding the individual (Uhlmann). Acknowledging an organizations core values and beliefs, I will be able to put the good of the organization and the general good before my own interests and ego. This also characterizes ethical leadership in making positive decisions that is best for the organization and for those I am responsible over (Jiang).

If the organizations core ethical values and beliefs do not align with my viewpoint or philosophy, I will be determined to not change my ethical values and beliefs under any circumstances or allow it to change within time. This decision is due to the disconnection between myself and the organizations values and beliefs to be dysfunctional and unethical. For example, if the organization decides to hire myself with diffe
