Abstract. *By its nature, the accounting field is in a close connection with ethics, morality and religion. The concepts of morality, ethics and religion are closely connected to each other and at the same time they are complementary. How many bankrupts occurred in economy and how many human dramas could be avoided if morality should have been present? How many rich people could be aware of the sufferings of the majority if the ethics of business would have been known to them? In our everyday living, all over the world and maybe especially in our Romanian space, we very much need a "minima moralia" in the businesses field. The fiddle from the public money, the fiscal evasion, reprogrammed payments and payment exemptions represent main objectives when starting the serious campaign of the moral sanitation in the business field. The temptation of money appeared the same time as "scene" entering of this sign of value. The mirage of the fortune has the same age with "homo oeconomicus". The true image, as a criterion of performance of the accounting field, is basal established on the concepts of ethical and moral nature: truth, honesty, regularity, reality, neutrality, continuity, permanency, etc. The achievement of the accounting truth claims, in equal parts, serious elements of professionalism. A real "fire test" for us is to prove through real facts the absolute governing of an unwritten law: we have to say what we think and, mostly, we must do what we say.*

Key words: morality, ethics, religion, true image, deontology, businesses.

Papers On Morality:

Essays on Political Morality Richard Mervyn Hare, 1998 R M Hare one of the most widely discussed of today's moral philosophers presents a selection of essays in which he brings ethical theory lucidly to bear on moral problems arising in politics He examines our obligation to obey the law the limits of legitimate lawbreaking civil violence and war rights of various sorts and their supposed conflict with utility justice distributive and retributive and care of the environment His arguments are amply illustrated by specific examples The volume substantiates the author's claim that help with such problems can be found in philosophy and particularly in his own ethical theory which draws together the best insights of Kant and utilitarians

Essays in Religion and Morality William James, 1982 *Essays in Religion and Morality* brings together a dozen papers of varying length to these two themes so crucial to the life and thought of William James Reflections on the two subjects permeate first James's presentation of his father's Literary Remains second his writings on human immortality and the relation between reason and faith third his two memorial pieces one on Robert Gould Shaw and the other on Emerson fourth his consideration of the energies and powers of human life and last his writings on the possibilities of peace especially as found in his famous essay The Moral Equivalent of War These speeches and essays were written over a period of twenty four years The fact that James did not collect and publish them himself in a single volume does not reflect on their intrinsic worth or on their importance in James's philosophical work since they include some of the best known and most influential of his writings All the essays throughout their varied subject matter are consistently and characteristically Jamesian in the freshness of their attack on the problems and failings of humankind and in their steady faith in human powers

Art and Morality José Luis Bermúdez, Sebastian Gardner, 2003-09-02 Art and Morality is a collection of groundbreaking new papers on the theme of aesthetics and ethics and the link between the two subjects A group of distinguished contributors tackle the important questions that arise when one thinks about the moral dimensions of art and the aesthetic dimension of moral life The volume is a significant contribution to philosophical literature opening up unexplored questions and shedding new light on more traditional debates in aesthetics The topics explored include the relation of aesthetic to ethical judgement the relation of artistic experience to moral consciousness the moral status of fiction the concepts of sentimentality and decadence the moral dimension of critical practice pictorial art and music the moral significance of tragedy and the connections between artistic and moral issues elaborated in the writings of central figures in modern philosophy such as Kant Schopenhauer and Nietzsche The contributors share the view that progress in aesthetics requires detailed study of the practice of criticism This volume will appeal both to the philosophical community and to researchers in areas such as literary theory musicology and the theory of art

Essays in Moral Skepticism Richard Joyce, 2016-01-28 Moral skepticism is the denial that there is any such thing as moral knowledge Some moral skeptics deny that moral judgments are beliefs some allow that moral judgments are beliefs but claim that they are all untrue others claim that all moral judgments are unjustified Since the publication of *The Myth of Morality* in 2001 Richard Joyce has explored the terrain of moral skepticism and perhaps more than any other living philosopher has been willing to advocate versions of this radical view Joyce's attitude toward morality is analogous to an atheist's attitude toward religion he claims that in making moral judgments speakers attempt to state truths e g that breaking promises is usually wrong but that the world simply isn't furnished with the properties and relations necessary to render such judgments true Moral thinking he argues probably emerged as a human adaptation but one whose usefulness derived from its capacity to bolster social cohesion rather than its ability to track truths about the world This forms the basis of Joyce's evolutionary debunking argument according to which evidence that a certain kind of judgment can be explained with no reference to its truth may reveal those judgments to lack warrant *Essays in Moral Skepticism* gathers together a dozen of Joyce's most significant papers from the last decade following the developments in his ideas presenting responses to critics and charting his exploration of the complex landscape of modern moral skepticism
