Part 1: Jelly Without the Peanut Butter
Mistakes: 16

Sum of us love peanut butter and jelly. But this kind of jelly would not be good on a sandwich! I'm talking about jellyfish. Jellyfishes come in a variety of kinds and sizes. Each different type has unique traits it is important to note that jellyfish can sting you. Their bodies have a large dome with long tentacles which trail behind them. Those tentacles can sting whatever they touch. The reason that they do that is to stun what they are trying to eat, but for humans they are not trying to eat us. It is a accident when they sting us. Thankfully, a sting to a human isn't deadly. However it can leave a mark on our skin and is very painful.

Part 2: Jelly Without the Peanut Butter
Mistakes: 16

Woe of the most interesting things about jellyfish is the way theyne bodies work. Their bodies are so magnificent and different which is why they thrive in so many different environments. Jellyfish can live in cold and warm ocean water. They can live in deep and shallow water too. Even though they are called jellyfish they are not fish! They have no backbone which means they are not fish and do not swim. they move forward thru the water by squirting water out of their mouths like a squirt gun! Also they are super fast and able to digest their food very quickly so they can zip around in the water. Jellyfish eat shrimp crabs fin plants and fish. No peanut butter for this kind of jelly!
