In the second half of World War II the German Army faced numerically superior armoured forces on the Eastern and Western Fronts In order to counter this threat tank destroyer production was increased One of these tank destroyers was the Jagdpanzer 38 t or Hetzer which proved to be a successful design with over 2 500 being produced in the 14 months before the end of the war This title provides all the information that AFV modellers will need to build variants of the Jagdpanzer 38 t Hetzer including the Bergepanzer 38 t recovery vehicle It also includes camouflage paint schemes and markings

Tank Warfare, 1939-1945 Simon Forty, Jonathan

Forty, 2020-07-19 On the battlefields of Europe and North Africa during the Second World War tanks played a key role and the intense pressure of combat drove forward tank design and tactics at an extraordinary rate In a few years on all sides tank warfare was transformed This is the dramatic process that Simon and Jonathan Forty chronicle in this heavily illustrated

history They describe the fundamentals of pre war tank design and compare the theories formulated in the 1930s as to how they should be used in battle Then they show how the harsh experience of the German blitzkrieg campaigns in Poland France and the Soviet Union compelled the Western Allies to reconsider their equipment organization and tactics and how the Germans responded to the Allied challenge The speed of progress is demonstrated in the selection of over 180 archive photographs which record as only photographs can the conditions of war on each battle front They also give a vivid impression of what armoured warfare was like for the tank crews of 75 years ago

Tank Gun Systems William Andrews, 2023-06-30 Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns

PANZERDIVISIONEN ES , **PANZERJÄGER** , *Panzer 38(t) vs BT-7* Steven J. Zaloga,2017-04-07 The tank battles in the Soviet Union during the summer of 1941 were the largest in World War II exceeding even the more famous Prokhorovka encounter during the Kursk campaign Indeed they were the largest tank battles ever fought This book examines two evenly matched competitors in this conflict the German Panzer 38 t and the Soviet BT 7 Both were of similar size armed with guns of comparable firepower and had foreign roots the Panzer 38 t was a Czechoslovak design and the BT 7 was an evolution of the American Christie tank With full colour artwork and archive and present day photography this absorbing study assesses the strengths and limitations of these two types against the wider background of armoured doctrine in the opening stages of Operation Barbarossa *M10 Tank Destroyer vs StuG III Assault Gun* Steven J. Zaloga,2013-08-20 The Allies M10 Tank Destroyer and the Germans Sturmgeschütz StuG III were the unsung workhorses of the northwest European battlefields of 1944 45 While their mission was not principally fighting one another their widespread use ensured their frequent encounters from the Normandy Bocage to the rubble strewn streets of Aachen The StuG III was the quintessential assault gun a low slung heavily armoured turret less vehicle intended to provide direct fire support for infantry formations whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer However by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks and was consequently relegated to infantry support too Widely deployed in roles their designers had not envisaged these two armoured fighting vehicles clashed repeatedly during the 11 month campaign which saw the Allies advance from Normandy to the heart of the Reich Fully illustrated with specially commissioned artwork this is the story of their confrontation at the height of World War II Modelling the Marder

Self-Propelled Gun Samuel Dwyer,2012-08-20 The term Marder meaning weasel was the name given to this family of open topped tank destroyers Combining high mobility and heavy firepower they saw significant combat action in several theatres This book provides a detailed guide to modelling the Marder in 1 35 scale and offers diverse challenges to modellers of all abilities Conversions interior detailing kit bashing adding aftermarket figures and parts creating different finishes and weathering techniques are all covered in step by step visual detail *Tank Turret Fortifications* Neil Short,2011-10-18 Tank Turret Fortifications traces the origins of the idea from the development of the first armoured turrets in the nineteenth century through to the present day On the way it covers the inter war period when the first turrets were used in this way the Second World War when tank turrets were used on every front in the European Theatre of Operations and the post war period when tank turrets were used even more widely The book also details the decline of the idea as countries reassessed the threats they faced and slowly dismantled all their fixed fortifications Widely used during World War Two and since tank turret fortifications deserve a history and Neil Short has spent several years writing this the first proper study *Hungarian armoured units during the Second World War* Eduardo Manuel Gil Martínez,2023-10-24 The actions of German armored forces during World War II are well known What has not yet been recounted as accurately are the actions of the armored forces of Germany s Allies While it is true that their performance was generally quite secondary to what the forces of the German Reich were able to afford the actions of the Hungarian armored forces which not only managed to organize their own armored forces in substantial autonomy but also developed their own military industry capable of supplying weapons and equipment to their troops should be emphasized This book will thus reveal a little known page of Hungary s participation in World War II through the use of superb photographs provided by the author and his contributors This story will take the reader from the beginning of the USSR campaign and consequent conquest of large Soviet territories and then end with the bloody battles to prevent the advance of the Soviet and Romanian counteroffensive in Hungary the siege of Budapest and the last battles in Austrian and Slovenian territory before the unconditional surrender of the army The author highlights the courage of these men and the terrible fate that would befall the Hungarian armored forces when the Soviet army invaded Hungary *Ostfront* Charles Winchester,2000-01-15 First published in 1999 this illustrated volume details the history of the decisive theatre of World War II the greatest land campaign in history including the largest battle ever fought Stalingrad Access to previously unpublished sources has enabled the authors to shatter several myths of the war on the eastern front **T-34/76 Medium Tank 1941-45** Steven J. Zaloga,2013-08-20 The T 34 was the most influential tank design of World War 2 When first introduced into combat in the summer of 1941 it represented a revolutionary leap forward in tank design Its firepower armour protection and mobility were superior to that of any other medium tank of the period This superiority did not last long While the T 34 underwent a series of incremental improvements during 1943 it was being surpassed by new German tank designs most notably the Panther This title traces the life of the original T 34 through all its difficulties to

eventual success
