Food Loss and Food Waste Michael Blakeney, Global food insecurity is a growing issue At a time when the world s population is increasing and agricultural production is challenged by climate change it is estimated that around a third of the food produced globally is lost or wasted This book examines the problem of food loss and waste FLW and the policies that could be enacted to remedy this fundamental global concern

Rural-urban differences in children's dietary diversity in Ethiopia Hirvonen, Kalle,2016-06-03 An emerging body of literature shows how low diversity in diets is associated with increased risk of chronic undernutrition and micro nutrient deficiencies in young children The latest available Demographic and Health Survey data

for Ethiopia reveals unusually large differences in children's dietary diversity between rural and urban areas. Applying recently developed non-linear decomposition methods, this large rural-urban gap in dietary diversity can almost entirely be explained by differences in household wealth, parental education, and access to health services between rural and urban areas.

Sociology David M. Newman, 2016-08-16. Adapted from David M. Newman's best-selling *Sociology: Exploring the Architecture of Everyday Life*, this briefer, streamlined version continues to show students how to see the unfamiliar in the familiar, inspiring them to think critically about their own lives and social contexts. As in the full text, the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that reads like a real book. It uses the metaphors of architecture and construction to help students understand that society is not something that exists out there independently of themselves; it is a human creation that is planned, formed, maintained, or altered by individuals. Rather than surveying every subfield in sociology, the Brief Edition focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

Market imperfections for tractor service provision in Nigeria Takeshima, Hiroyuki, 2016-07-01. In Nigeria, despite the scarcity of tractors, average horsepower and prices of tractors appear high. These patterns are different from the experiences in other parts of the world where initially tractor horsepower was often smaller, such as in Asia, or farmers were better endowed with land and wealth, such as in Latin America. In Nigeria, joint ownership of tractors is rare and formal loans are often unavailable due to high transaction costs. IFPRI's survey in Kaduna and Nasarawa states in 2013 suggested that the spatial mobility of tractors is generally low and the use of tractors is highly seasonal. There do not seem to be plausible explanations for the seeming dominance of large tractor use based on available information on prices and soils. Nevertheless, these patterns seem driven by the own initiative of the private sector rather than by government policies. Indivisibility of large tractors and limited mobility of supplies may cause imperfections in the custom tractor hiring market. In order to distinguish the impacts of technology adoption at the extensive margin from those at the intensive margin, in the empirical analyses for the research presented here, we tested these hypotheses focusing on the differences among marginal adopters of tractor hiring services and non-adopters with similar characteristics. The results are three-fold: 1) adoption patterns of tractor services are partly explained by basic factor endowments, suggesting that the market for custom hiring is in some way functioning efficiently in response to economic conditions; 2) adoptions are however affected by supply-side factors, including the presence of large farm households and thus potential tractor owners within the district; and 3) per capita household expenditure level differs significantly between the marginal adopters and non-adopters with similar characteristics. This difference seems to arise from adoption per se rather than the intensity of adoption, which is consistent with the hypothesis of imperfection in the custom tractor hiring market.

The Budget of the United States Government United States, 1939 **Routledge Handbook of Food and Nutrition Security** Bill Pritchard, Rodomiro Ortiz, Meera Shekar, 2016-03-31. The concept of food and nutrition security has evolved and

risen to the top of the international policy agenda over the last decade Yet it is a complex and multi faceted issue requiring a broad and inter disciplinary perspective for full understanding This Handbook represents the most comprehensive compilation of our current knowledge of food and nutrition security from a global perspective It is organized to reflect the wide scope of the contents its four sections corresponding to the accepted current definitional frameworks prevailing in the work of multilateral agencies and mainstream scholarship The first section addresses the struggles and progression of ideas and debates about the subject in recent years The other sections focus on three key themes how food has been is and should be made available including by improvements in agricultural productivity the ways in which politico economic and social arenas have shaped access to food and the effects of food and nutrition systems in addressing human health known as food utilisation Overall the volume synthesizes a vast field of information drawn from agriculture soil science climatology economics sociology human and physical geography the nutrition and health sciences environmental science and development studies
