Paper1 Life Science Grade10 November 2013 Final Exam:

All the Rage Virginia Nicholson, 2024-08-06 A panoramic social history that chronicles the quest for beauty in all its contradictions and how it affects the female body Who decides what is fashionable What clothes we wear what hairstyles we create what colour lipstick we adore what body shape is all the rage The story of female adornment from 1860 1960 is intriguingly unbuttoned in this glorious social history Virginia Nicholson has long been fascinated by the way we women present ourselves or are encouraged to present ourselves to the world Women have been fat or slim hyperthyroid or splenetic sallow or pink cheeked slouched or erect according to the prevalent notions of beauty Cecil Beaton *The Glass of Fashion* 1954 In this book we learn about rational dress suffragettes hats the Marcel wave the Gibson Girls corsets and the banana skirt At the centre of this story is the female body in all its diversity fat thin short tall brown white black pink smooth hairy wrinkly youthful crooked or symmetrical and relevant as ever in this context the vexed issues of body image and bodily autonomy We may even find ourselves wondering whose body is it In the hundred years this book charts the western world saw the rapid introduction of new technologies like photography film and eventually TV which for better and worse thrust women and female imagery out of the private and into the public gaze Universities Handbook, 2014 **The Allure of Order** Jal Mehta, 2013-04-02 Ted Kennedy and George W Bush agreed on little but united behind the No Child Left Behind Act NCLB Passed in late 2001 it was hailed as a dramatic new departure in school reform It would make the states set high standards measure student progress and hold failing schools accountable A decade later NCLB has been repudiated on both sides of the aisle According to Jal Mehta we should have seen it coming Far from new it was the same approach to school reform that Americans have tried before In *The Allure of Order* Mehta recounts a century of attempts at revitalizing public education and puts forward a truly new agenda to reach this elusive goal Not once not twice but three separate times in the Progressive Era the 1960s and 70s and NCLB reformers have hit upon the same idea for remaking schools Over and over again outsiders have been fascinated by the promise of scientific management and have attempted to apply principles of rational administration from above Each of these movements started with high hopes and ambitious promises but each gradually discovered that schooling is not easy to order from afar policymakers are too far from schools to know what they need teachers are resistant to top down mandates and the practice of good teaching is too complex for simple external standardization The larger problem Mehta argues is that reformers have it backwards they are trying to do on the back end through external accountability what they should have done on the front end build a strong skilled and expert profession Our current pattern is to draw less than our most talented people into teaching equip them with little relevant knowledge train them minimally put them in a weak welfare state and then hold them accountable when they predictably do not achieve what we seek What we want Mehta argues is the opposite approach which characterizes top performing educational nations attract strong candidates into teaching develop relevant and usable knowledge train teachers extensively in that knowledge

and support these efforts through a strong welfare state The Allure of Order boldly challenges conventional wisdom with a sweeping empirically rich account of the last century of education reform and offers a new path forward for the century to come
