

The learner will be expected to compile a portfolio of evidence based on the research/investigation on a specific topic to depict, sell, demonstrate or advertise the topic. This portfolio will contain all the evidence on the topic that the learner could gather. This should include reports, presentations, photographs, pictures, graphs, sketches, diagrams, etc.

An example of a portfolio of evidence: Evidence of the degradation of the environment.

4.5.2 Project

The **project** will be a piece of work in which knowledge, skills and values which lead towards competence in the specific or integrated content, are demonstrated. The project requires extended reading and writing on the part of the learner. The project will involve thorough investigation into and sourcing information on a selected topic in the curriculum. This could take the form of an interview, observation and making suggestions to improve upon the topic. The objective for the project should be clear and thorough planning should take place, e.g. preparing the questions for an interview. This is followed by the research, and finally the data/ information has to be collated into evidence. The evidence will be in the form of an essay with sub-headings relating to the criteria of the task.

Although learners will spend time outside of contact time to collect resources and information, the completion of the task has to be facilitated by the teacher in class time. The topic and nature of the project will be determined by the content covered according to the annual teaching plan. Learners should be given a project before the end of the second term, after the content related to the project has been addressed, for submission during the third term. Learners will need adequate guidance at the outset of the project and progress should be monitored throughout. All assessment criteria applicable to the project has to be discussed with the learners prior to the commencement of the project.

Examples of a project:

- Community project to address a social or environmental issue
- Investigation of lifestyle choices and their impact on the overall well-being of the South African youth
- Research and apply decision-making skills to challenging situations set in different contexts: a plan of action or advice for long-term success should be provided.

When preparing a project, consider these minimum requirements:

- A cover page
- A table of contents
- Text divided into paragraphs/sections as indicated in the instructions/criteria for the project
- Pictures, photos, diagrams and graphs may be included
- Include a bibliography
- The project should be bound or stapled.

4.5.3 Examinations

Digital Diplomacy Corneliu Bjola, Marcus Holmes, 2015-03-24 This book analyses digital diplomacy as a form of change management in international politics The recent spread of digital initiatives in foreign ministries is often argued to be nothing less than a revolution in the practice of diplomacy In some respects this revolution is long overdue Digital technology has changed the ways firms conduct business individuals conduct social relations and states conduct governance internally but states are only just realizing its potential to change the ways all aspects of interstate interactions are conducted In particular the adoption of digital diplomacy i e the use of social media for diplomatic purposes has been implicated in changing practices of how diplomats engage in information management public diplomacy strategy planning international negotiations or even crisis management Despite these significant changes and the promise that digital diplomacy offers little is known from an analytical perspective about how digital diplomacy works This volume the first of its kind brings together established scholars and experienced policy makers to bridge this analytical gap The objective of the book is to theorize what digital diplomacy is assess its relationship to traditional forms of diplomacy examine the latent power dynamics inherent in digital diplomacy and assess the conditions under which digital diplomacy informs regulates or constrains foreign policy Organized around a common theme of investigating digital diplomacy as a form of change management in the international system it combines diverse theoretical empirical and policy oriented chapters centered on international change This book will be of much interest to students of diplomatic studies public diplomacy foreign policy social media and international relations

Marxism, Psychology and Social Science Analysis Julian Roche, 2018-06-14 Marxism Psychology and Social Science Analysis applies Marxist theory psychology and the work of Lucien S ve to specific research in the social sciences It shows in practical terms what guidance can be offered for social scientific researchers wanting to incorporate S ve s view of personality into their work Providing case studies drawn from different social sciences that give the book significant breadth of scope Roche reviews the impact of Taking S ve Seriously across the study of international relations theory economics law and moral philosophy The book begins by placing the work of Lucien S ve in context and considers the development of psychology in relation to Marxism before going on to summarise the work of S ve in relation to the psychology of personality It considers the opportunities for refreshed research in social relations based on developments by S ve before examining Marxist biography and the implications of S ve s views The book also includes chapters on the social discount rate on constructivism in international relations on the concept of promising in moral philosophy and the Marxist conception of individual responsibility It addresses not only how research should be carried out differently but whether utilising the theoretical framework of other writers even non Marxists can deliver a similar outcome With its use of five distinct case studies to analyse the work of Lucien S ve this unique book will be of great interest to

academics researchers and postgraduate students in the fields of psychology philosophy and social sciences *The Exquisite Corpse of Asian America* Rachel C. Lee,2014-12-05 Addresses this central question if race has been settled as a legal or social construction and not as biological fact why do Asian American artists authors and performers continue to scrutinize their body parts *Choice and Preference in Media Use* Silvia Knobloch-Westerwick,2014-07-25 Mediated messages flood our daily lives through virtually endless choices of media channels genres and content However selectivity determines what media messages we attend to and focus on The present book examines the factors that influence this selectivity Seminal books on selective media exposure were published in 1960 by Klapper and in 1985 by Zillmann and Bryant But an integrated update on this research field is much needed as rigorous selective exposure research has flourished in the new millennium In the contexts of political communication health communication Internet use entertainment consumption and electronic games the crucial question of how individuals choose what content they consume has garnered much attention The present book integrates theories and empirical evidence from these domains and discusses the related research methodologies In light of the ever increasing abundance of media channels and messages selective exposure has become more important than ever for media impacts This monograph provides a comprehensive review of the research on selective exposure to media messages which is at the heart of communication science and media effects It is required reading for media scholars and researchers and promises to influence and inspire future research *The Oxford Handbook of Vowel Harmony* Nancy A. Ritter,Harry van der Hulst,2024-10-17 This handbook provides a detailed account of the phenomenon of vowel harmony a pattern according to which all vowels within a word must agree for some phonological property or properties Vowel harmony has been central in the development of phonological theories thanks to its cluster of remarkable properties notably its typically unbounded character and its non locality and because it forms part of the phonology of most world languages The five parts of this volume cover all aspects of vowel harmony from a range of theoretical and methodological perspectives Part I outlines the types of vowel harmony and some unusual cases before Part II explores structural issues such as vowel inventories the interaction of vowel harmony and morphological structure and locality The chapters in Part III provide an overview of the various theoretical accounts of the phenomenon as well as bringing in insights from language acquisition and psycholinguistics while Part IV focuses on the historical life cycle of vowel harmony looking at topics such as phonetic factors and the effect of language contact The final part contains 31 chapters that present data and analysis of vowel harmony across all major language families as well as several isolates constituting the broadest coverage of the phenomenon to date **Observing Children in Their Natural Worlds** Anthony D. Pellegrini, Frank Symons, John Hoch,2014-04-08 This second edition updates the methods based on new technologies updates and increases the number of examples and reorganizes so the theoretical material is up front The author s decisions were guided by having used the first edition in classes at two universities Consequently he received feedback on the book from a

variety of different perspectives from groups of very conscientious and competent students and from colleagues around the world who have used the book. By consensus the most popular aspect of the first edition was the organization of the book where the student researcher is guided through conceptualizing, designing, implementing, and writing up the research project. This basic organization is the same as in the first edition; however, within this organizational frame, things have changed. The discussion of the place of direct observational methods in relation to different qualitative and quantitative research traditions has been kept but expanded. Discussions of the use of direct observations in naturalistic settings, drawing from research methods in ethology and ethnography, and in more contrived settings, drawing from experimental psychology, are extended. Relatedly, an extended discussion has been added on theories of science guiding different research assumptions. In addition, sections on validity, reliability, and the ethics surrounding the research enterprise are also expanded. These constructs are not specific to observational methods but relevant to the general research process. In revised chapters in these areas, the author provides grounding in the general concepts and then draws more specific focus to observational methods. The extended discussion of ethics is important since issues related to who gets authorship on papers, how to complete Institutional Review Board forms, and honesty in reporting findings are all issues that face both junior and senior researchers alike. Practical issues of writing research papers are expanded in this edition, providing discussions of writing both review and empirical articles. Lastly, a new and extensive chapter on using technology in direct observational methods has been added, which reviews the available hardware and software in direct observational methods.
