**Decolonising Geography? Disciplinary Histories and the End of the British Empire in Africa, 1948-1998** Ruth Craggs, Hannah Neate, 2023-10-02 **DECOLONISING GEOGRAPHY** This book presents an extraordinarily sensitive account of geography's histories in five African countries subjected to British colonial rule. Craggs and Neate draw together political and imaginative processes of decolonisation through an innovative biographical approach that humanizes and enlivens the story of our academic discipline. It will be an invaluable resource for those seeking a deeper understanding of decolonisation, its recent trajectories and far-reaching implications on the African continent. Shari Daya Affiliate Associate Professor in Environmental and Geographical Science, University of Cape Town. By placing the experiences, ideas and practices of African geographers in the center of their analyses, Craggs and Neate provide an unprecedented account of historical and contemporary decolonizing struggles within Geography and the academy. This book should be required reading for all those looking to decolonize the discipline and dislodge it from its Global North histories, institutions and ideologies. Mona Domosh, Professor of Geography, The Joan P and Edward J Foley Jr 1933 Professor, Dartmouth College. This meticulous work explores how colonialism, decolonization and postcolonialism shaped African geography and geographers. It sheds light on efforts to Africanize the discipline, a process which I was both witness to and a participant in. Stanley Okafor, Professor of Geography, Retired, University of Ibadan. How did a generation of academic geographers engage with constitutional decolonisation during the end of the British empire in Africa? In *Decolonising Geography: Disciplinary Histories and the End of the British Empire in Africa 1948-1998*, Ruth Craggs and Hannah Neate explore how the teaching, research, administration and activism of geographers in Africa shaped the discipline and the post-colonial geopolitics of the continent. The authors follow the professional lives of individual geographers to provide fresh insights into decolonisation in the former British Empire in Africa, drawing from extensive archival research and more than 40 oral history interviews with geographers in Ghana, Nigeria, South Africa, Tanzania and the UK. *Decolonising Geography* is a must-read for any reader in the UK and Africa with an interest in the relationships between geography and decolonisation.

**The War Lawyers** Craig Jones, 2020-11-26 Over the last 20 years, the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations, spaces which had previously been exclusively for generals and commanders. These professionals, trained and hired to give legal advice on an array of military operations, have become known as war lawyers. *The War Lawyers* examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza. Drawing on interviews with military lawyers and others, this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked, whether by manned aircraft, drones and/or ground forces, and with what results. This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood. Jones argues that circulations

of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

*Tin and Global Capitalism, 1850-2000* Mats Ingulstad, Andrew Perchard, Espen Storli, 2014-09-04 For most of the twentieth century tin was fundamental for both warfare and welfare The importance of tin is most powerfully represented by the tin can an invention which created a revolution in food preservation and helped feed both the armies of the great powers and the masses of the new urban society The trouble with tin was that economically viable deposits of the metal could only be found in a few regions of the world predominantly in the southern hemisphere while the main centers of consumption were in the

industrialized north The tin trade was therefore a highly politically charged economy in which states and private enterprise competed and cooperated to assert control over deposits smelters and markets Tin provides a particularly telling illustration of how the interactions of business and governments shape the evolution of the global economic trade the tin industry has experienced extensive state intervention during times of war encompasses intense competition and cartelization and has seen industry centers both thrive and fail in the wake of decolonization The history of the international tin industry reveals the complex interactions and interdependencies between local actors and international networks decolonization and globalization as well as government foreign policies and entrepreneurial tactics By highlighting the global struggles for control and the constantly shifting economic geographical and political constellations within one specific industry this collection of essays brings the state back into business history and the firm into the history of international relations

The Rise and Fall of the Rehabilitative Ideal, 1895-1970 Victor Bailey, 2019-04-09 Spanning almost a century of penal policy and practice in England and Wales this book is a study of the long arc of the rehabilitative ideal beginning in 1895 the year of the Gladstone Committee on Prisons and ending in 1970 when the policy of treating and training criminals was very much on the defensive Drawing on a plethora of source material such as the official papers of mandarins ministers and magistrates measures of public opinion prisoner memoirs publications of penal reform groups and prison officers the reports of Royal Commissions and Departmental Committees political opinion in both Houses of Parliament and the research of the first cadre of criminologists this book comprehensively examines a number of aspects of the British penal system including judicial sentencing law making and the administration of legal penalties In doing so Victor Bailey expertly weaves a complex and nuanced picture of punishment in twentieth century England and Wales one that incorporates the enduring influence of the death penalty and will force historians to revise their interpretation of twentieth century social and penal policy This detailed and ground breaking account of the rise and fall of the rehabilitative ideal will be essential reading for scholars and students of the history of crime and justice and historical criminology as well as those interested in social and legal history

*Streaming and Copyright Law* Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is

uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part. Conversely the fair dealing defence in Australia cannot be used aptly to defend end users' acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire or research or study. When considering a temporary copy exception, end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website blocking laws have emboldened copyright owners while suppressing end users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions.

**Decolonization and Conflict** Martin Thomas, Gareth Curless, 2017-06-15

Insurgency-based irregular warfare typifies armed conflict in the post-Cold War age. For some years now, western and other governments have struggled to contend with ideologically driven guerrilla movements, religiously inspired militias, and systematic targeting of civilian populations. Numerous conflicts of this type are rooted in experiences of empire breakdown. Yet few multi-empire studies of decolonisation's violence exist. *Decolonization and Conflict* brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe's empires after 1945. The contributors analyse multiple forms of colonial counter-insurgency, from the military engagement of anti-colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare. Contributors to the collection also show how insurgencies, their propaganda and methods of action, were inherently transnational and interconnected. The resulting study is a vital contribution to our understanding of contested decolonization. It emphasises the global connections at work and reveals the contemporary resonances of both anti-colonial insurgencies and the means devised to counter them. It is essential reading for students and scholars of empire, decolonization and asymmetric warfare.

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30

People on the move face new barriers in a globalizing world. Some of these barriers are related with the rise of an increasingly security-oriented approach towards international migrants. Notwithstanding the forces of globalization, states have maintained their monopoly power over whom to admit and whom to deny within their borders. In other words, they remain the sovereign authority regulating the entry and exit of people. However, in recent years, a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security. The

securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia Johnson PART B Regulations Suspension of Human Rights CHAPTER 4 Borders Exception and Sovereignty Australia s Migration Policies as Instruments of Suspension of Human Rights and International Obligations by Ana Carolina Macedo Abreu CHAPTER 5 Power and Sandwiched Sovereignty Nepali Migrant Workers in the Gulf Countries by Hari KC CHAPTER 6 The Body and Embodied Experiences in the British Asylum System Developing a Conceptual Perspective by Rebecca Mavin CHAPTER 7 Eritrean Unaccompanied Refugee Minors in The Netherlands Wellbeing and Health by Anna de Haan Yodit Jacob Trudy Mooren and Winta Ghebreab PART C Migrants Strategies and Identities CHAPTER 8 Social Inclusion Processes for unaccompanied minors in the city of Palermo Fostering Autonomy through a New Social Inclusion Model by Roberta Lo Bianco and Georgia Chondrou CHAPTER 9 Urban Resistances and Migrant Activism Challenging the Border Regime in Madrid City by Ana Santamarina and Almudena Cabezas CHAPTER 10 RefConnect A Mobile Social Network for Refugees by Evdokia Kogia Styliani Liberopoulou Nikolaos Alamanos Vasilis Pierros and Christos Michalakelis CHAPTER 11 Halo Halo Nostalgia and Navigating Life for Overseas Filipino Workers OFW s in the Kingdom of Saudi Arabia by Simeon S Magliveras

*Education and Enmity (Routledge Revivals)* Donald Akenson, 2013-04-03. First published in 1973, Professor Akenson's book traces the series of religious and political controversies which have battered the state schools of Northern Ireland. After the government's admirably intentioned but muddled attempt to create a non-sectarian school system in the early 1920s, the educational system was progressively manipulated by sectarianism. The way in which the author describes how children are schooled reveals a great deal about the attitudes and values of the parental generation and also helps to explain the actions of later generations.
