## **Paper Feeding Encoder:**

Advanced Manufacturing and Automation XIII Yi Wang, Tao Yu, Kesheng Wang, 2024-02-24 The book is a compilation of selected papers from the 13th International Workshop of Advanced Manufacturing and Automation IWAMA 2023 held in Shanghai University of Engineering Science China on 15-16 October 2023. Topics focusing on novel techniques for manufacturing and automation in Industry 4.0 are now vital factors for the maintenance and improvement of the economy of a nation and the quality of life. It will help academic researchers and engineers to implement the concept, theory and methods in Industry 4.0 which has been a hot topic. These proceedings will make valuable contributions to academic researchers, engineers in the industry for the challenges in the 4th industry revolution and smart factories. Hands-On Generative AI with Transformers and Diffusion Models Omar Sanseviero, Pedro Cuenca, Apolinário Passos, Jonathan Whitaker, 2024-11-22 Learn to use generative AI techniques to create novel text, images, audio, and even music with this practical hands-on book. Readers will understand how state-of-the-art generative models work, how to fine-tune and adapt them to their needs, and how to combine existing building blocks to create new models and creative applications in different domains. This book introduces theoretical concepts followed by guided practical applications with extensive code samples and easy-to-understand illustrations. You will learn how to use open-source libraries to utilize transformers and diffusion models, conduct code exploration, and study several existing projects to help guide your work. Build and customize models that can generate text and images. Explore trade-offs between using a pretrained model and fine-tuning your own model. Create and utilize models that can generate, edit, and modify images in any style. Customize transformers and diffusion models for multiple creative purposes. Train models that can reflect your own unique style.

Assessing Policy Effectiveness using AI and Language Models Chandrasekar Vuppapapati, 2024-05-30 This volume uses advanced machine learning techniques to analyze government communication to evaluate policy effectiveness. The book develops policy effectiveness foundation models by cohorting historical budget policies with statistical models which are built on well-reputed data sources including economic events, macroeconomic trends, and ratings and commerce terms from international institutions. By signal mining policies to the economic outcome patterns, the book aims to create a rich source of successful policy insights in terms of their effectiveness in bringing development to the poor and underserved communities to ensure the spread of wealth, social wellbeing, and standard of living to the common denomination of society rather than a selected quotient. Enabling academics and practitioners across disciplines to develop applications for effective policy interventions, this volume will be of interest to a wide audience including software engineers, data scientists, social scientists, economists, and agriculture practitioners.

Intelligent Systems and Applications Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-08 Gathering the Proceedings of the 2018 Intelligent Systems Conference IntelliSys 2018, this book offers a

remarkable collection of chapters covering a wide range of topics in intelligent systems and computing and their real world applications The Conference attracted a total of 568 submissions from pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process after which 194 including 13 poster papers were selected to be included in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have made it possible to tackle many problems more effectively This branching out of computational intelligence in several directions and the use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue for reporting on cutting edge innovations and developments This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope Readers are sure to find the book both interesting and valuable as it presents state of the art intelligent methods and techniques for solving real world problems along with a vision of future research directions
