Running head: Personality Paper Personality Paper Shacena Dunn Psy/405 – Theories of Personality November 29, 2010 Linda O'Connor Personality Paper The term personality has been heard throughout history. Each individual can give a description of their personality as well as her friends. What people fail to understand is personality is the most theorized and researched aspect of psychology. Throughout the report the reader will be able to define personality, explain the theoretical approach to studying personality, and be able to analyze factors that may influence an individual's personality development.

Personality is defined as, "the relatively enduring characteristics that differentiate people- those behaviors that makes each individual unique" (Feldman, 199, p. 472). According to Feist (2009), personality is defined as, "a pattern of relatively permanent traits and unique characteristics that give both consistency and individuality to a person's behavior. In order to get a better understanding of personality, one must be able to differentiate trait from state of personality. A trait is a permanent characteristic. Example of trait is outgoing, shy, friendly, etc.

These traits are used to understand one's personality. While state is a temporary change in one's personality. Example of state is depressed, scared, angry, etc. States are used to describe one's reaction. When studying personality there are many approaches that answer the question who we are and why we are alike and different. The five theoretical approaches that will be discussed in this report are psychoanalytic theory, trait theory, cognitive-social approach, biological and evolutionary approach, and humanistic approach.

According to Feldman (1999), the theoretical approaches to studying personality are as follow: * Psychoanalytic theory approach developed by Sigmund Freud based his theory that unconscious motivation and needs influence behavior. Freud suggests that personality consist of three components: the id, the ego and the super ego. Personality develops during series of stages in which the focus of pleasure is on a particular part of the body. * Trait theory approach identifies the basic traits use to describe one's personality.

They give a clear understanding of one's behavioral consistencies. * Cognitive-social theory approach identifies the influences of a person's cognition, the thought, feelings, expectations and values in

Invertebrate Animals Claudio Carere,Jennifer Mather,2019-07-02 This book is devoted to the welfare of invertebrates which make up 99% of animal species on earth Addressing animal welfare we do not often think of invertebrates in fact we seldom consider them to be deserving of welfare evaluation And yet we should Welfare is a broad concern for any animal that we house control or utilize and we utilize invertebrates a lot The Authors start with an emphasis on the values of non vertebrate animals and discuss the need for a book on the present topic The following chapters focus on specific taxa tackling questions that are most appropriate to each one What is pain in crustaceans and how might we prevent it How do we ensure that octopuses are not bored What do bees need to thrive pollinate our plants and give us honey Since invertebrates have distinct personalities and some social animals have group personalities how do we consider this And as in the European Union s application of welfare consideration to cephalopods howdo the practical regulatory issues play out We have previously relegated invertebrates to the category things and did not worry about their treatment New research suggest that some invertebrates such as cephalopods and crustaceans can have pain and suffering might also have consciousness and awareness Also good welfare is going to mean different things to spiders bees corals etc This book is taking animal welfare in a very different direction Academics and students of animal welfare science those who keep invertebrates for scientific research or in service to the goals of humans as well as philosophers will find this work thought provoking instructive and informative

The Individual and the Group Malcolm Pines,2012-12-06 Malcolm Pines and Lise Rafaelsen The Seventh International Congress of Group Psychotherapy organized in Copenhagen by the International Association of Group Psychotherapy was one of the largest and most representative congresses on this subject that has yet been held Probably for the first time we achieved the declared aim of the International Association that of bringing together representatives of the different approaches to group psychotherapy in the same forum to allow for communication exchange and development of our relation ships Previous congresses have been less representative and it seems to augur well for the future of the Association and of it s congresses that there was this strong force and wish for unification and for exchange within the field of group psychotherapy The Congress theme The Individual and the Group Boundaries and Interrelations in Theory and

Practice was chosen because it gave an opportunity once again to examine the very basis for group psycho therapy as theory and as practice The basic theme stated in the opening papers by Professor Marie Jahoda and Professor James Anthony was replayed daily with new developments and variations according to the theoretical position of each subsequent speaker
