Topics discussed include Pannenberg's theological method, defense of the historicity of Jesus, resurrection, doctrine of God, doctrine of the Trinity, theory of time, doctrine of creation, doctrine of salvation, and public theology.

Rhetorical Spaces Lorraine Code, 2013-03-07 The arguments in this book are informed at once by the moral, political implications of how knowledge is produced and circulated and by issues of gendered subjectivity. In their critical dimension, these lucid essays engage with the incapacity of the philosophical mainstream's dominant epistemologies to offer regulative principles that guide people in the epistemic projects that figure centrally in their lives. In its constructive dimension, *Rhetorical Spaces* focuses on developing productive case-by-case analyses of knowing other people in situations where social, political inequalities create asymmetrical patterns of epistemic power and privilege.

The Journal of Microscopy and Natural Science: the Journal of the Postal Microscopical Society, 1889 How to Rethink Mental Illness Bernard Guerin, 2017-03-16 The world of mental illness is typically framed around symptoms and cures where every client is given a label In this challenging new book Professor Bernard Guerin provides a fresh alternative to considering these issues based in interdisciplinary social sciences and discourse analysis rather than medical studies or cognitive metaphors A timely and articulate challenge to mainstream approaches Guerin asks the reader to observe the ecological contexts for behavior rather than diagnose symptoms to find new ways to understand and help those experiencing mental distress This book shows the reader how we attribute mental illness to someone's behavior why we call some forms of suffering mental but not others what Western diagnoses look like when you strip away the theory and categories why psychiatry and psychology appeared for the first time at the start of modernity the relationship between capitalism and modern ideas of mental illness why it seems that women the poor and people of Indigenous and non Western backgrounds have worse mental health how we can rethink the hearing of voices more

ecologically how self identity has evolved historically how thinking arises from our social contexts rather than from inside our heads Offering solutions rather than theory to develop a new post internal psychology How to Rethink Mental Illness will be essential reading for every mental health professional as well as anyone who has either experienced a mental illness themselves or helped a friend or family member who has

Portalism Jeffrey Laird, 2022-11-25 The mind is not the brain The locus of our consciousness is in the world Portalism embraces radical phenomenal externalism and represents a contemporary form of dualism that rejects materialist assumptions of mind brain identity As a philosophy of mind Portalism breaks with traditional thinking in two significant ways first by holding that consciousness is in fact a fifth fundamental force of nature endowed with behavioural attributes not unlike that of gravity and second by arguing how consciousness inheres in all living organisms regardless of their biological sophistication Portalism compels us to reject traditional monist theories about the nature of consciousness and boldly enter into a new way of thinking about our own reality
