Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States Geek Sublime Vikram Chandra, 2014-09-02 The nonfiction debut from the author of the international bestseller *Sacred Games* about the surprising overlap between writing and computer coding Vikram Chandra has been a computer programmer for almost as long as he has been a novelist In this extraordinary new book his first work of nonfiction he searches for the connections between the worlds of art and technology Coders are obsessed with elegance and style just as writers are but do the words mean the same thing to both Can we ascribe beauty to the craft of writing code Exploring such varied topics as logic gates and literary modernism the machismo of tech geeks the omnipresence of an Indian Mafia in Silicon Valley and the writings of the eleventh century Kashmiri thinker Abhinavagupta *Geek Sublime* is both an idiosyncratic history of coding and a fascinating meditation on the writer's art Part literary essay part technology story and part memoir it is an engrossing original and heady book of sweeping ideas **What About Us?** Edgar D. Johnson, 2010-12-01 Over the past three decades the standards based reform movement has transformed K 12 education in the United States culminating with passage of the No Child Left Behind Act in 2002 Beyond making reasonable accommodations for special needs students standards based education pays little attention to other areas of student difference relying instead on a rational actor model of student experience and ignoring how differences in students backgrounds and orientations impact their particular experiences of schooling This book examines the development of standards based education with particular scrutiny of the roles of the

National Governors Association and its National Education Summit events Examination of important documents emerging from those events provides an illustration of the conceptually impoverished understanding of student subjectivity motivation and agency inherent in standards based education In order to understand both problems with and alternatives to standards based education the author examines the roles of ideology rhetoric and audience in school policy In three case studies the author analyzes several non school models of education including Marine Corps bootcamp Ving Tsun kung fu training and an online school resistance community Johnson argues that examination of these learning contexts provides a better understanding of the shortcomings and dangers of the standards based model of student subjectivity and suggests a set of fourteen principles to inform the development of more student centered alternatives The Psychosocial Aspects of a Deadly Epidemic Judy Kuriansky,2016-03-21 Edited by a clinical psychologist who has been on the ground helping to develop psychosocial support for Ebola survivors in one of the hardest hit regions of West Africa this book explains the devastating emotional aspects of the epidemic and its impact on survivors and the population in West Africa families in the diaspora and people in the United States and other countries It also describes lessons learned from past epidemics like HIV AIDS and SARS and valuable approaches to healing from future epidemics While the devastating Ebola epidemic has been contained the effects of this outbreak referred to by the World Health Organization as the most severe acute public health emergency seen in modern times have wreaked a tremendous emotional toll on the populations of West Africa as well as on families and survivors worldwide This groundbreaking book covers the psychosocial needs programs and policies related to the Ebola epidemic and examines broader lessons of the outbreak such as changes in the ways in which healing from future epidemics can be handled Edited by Judy Kuriansky PhD a noted clinical psychologist and United Nations NGO representative with extensive experience helping after disasters worldwide and direct experience gained from being on the ground in West Africa in the midst of the epidemic this book identifies and explains universal psychological factors at play in all such crises It debunks myths regarding Ebola and describes the resulting psychological and social harm caused by the epidemic The chapters cover overarching emotional issues and problems as well as the long term impact on at risk groups such as children women and health workers the impact of emotional issues on social and economic life responses of government officials media and various aid organizations and solutions being offered by groups worldwide including service and humanitarian organizations politicians policymakers and public health education groups **Duped** Saul Kassin,2022-06-15 Why do people confess to crimes they did not commit And surely those cases must be rare In fact it happens all the time in police stations workplaces public schools and the military Psychologist Saul Kassin the world s leading expert on false confessions explains how interrogators trick innocent people into confessing and then how the criminal justice system deludes us into believing these confessions Duped reveals how innocent men women and children intensely stressed and befuddled by lawful weapons of psychological interrogation are induced into confession no matter how horrific the crime By featuring riveting case studies

highly original research work by the Innocence Project and quotes from real life exonerees Kassin tells the story of how false confessions happen and how they corrupt forensics witnesses and other evidence force guilty pleas and follow defendants for their entire lives even after they are exonerated by DNA Starting in the 1980 s Dr Kassin pioneered the scientific study of interrogations and confessions Since then he has been on the forefront of research and advocacy for those wrongfully convicted by police induced false confessions Examining famous cases like the Central Park jogger case and Amanda Knox case as well as stories of ordinary innocent people trapped into confession Dr Kassin exposes just how widespread this problem is Concluding with actionable solutions and proposals for legislative reform *Duped* shows why the stigma of confession persists and how we can reform the criminal justice system to make it stop **Self-Determination Theory**
