SERIAL DIGITAL SYNC GENERATORS

HARRIS
assured communications

The VSG-201D and VSG-204D sync generators are specifically designed for use in 601 serial digital and hybrid analog/digital applications in both 525/60 and 625/50 systems. A high-stability TCXO provides the necessary accuracy for the most demanding requirements. All models have infinite genlock timing range, and four analog blackburst outputs for system timing plus constant digital black and digital test signals. Two of the black burst outputs in the VSG-204D have independently adjustable timing over the entire range. All models have stereo analog tone, and the VSG-204D provides both embedded and separate AES/EBU tone (or silent) with level adjustment and channel placement via front panel control. For total flexibility, the VSG-204D also has 10 selectable test signals, and can be set to simultaneously output NTSC and PAL blackburst all timed together with the AES/EBU audio.

The VSG-201D and VSG-204D are ideal for use as either a master or slave sync generator in any system, making Harris the only choice for a digital sync generator to meet both your needs and your budget.

Provide reliable protection for your system during a primary reference signal loss by adding a V SX-11D multi-format sync changeover to your pair of sync generators.
