**Practical Cardiotocography** AK Debdas, 2013-05-30 Cardiotocography or CTG uses ultrasound to measure a baby's heart rate. At the same time it also measures the contractions in the uterus. New Venous Thromboembolic Disease chapter provides current information on this increasingly common condition. After little more than half a century since its initial development, computer code is extensively and intimately woven into the fabric of our everyday lives. From the digital alarm clock that wakes us to the air traffic control system that guides our plane in for a landing, software is shaping our world. It creates new ways of undertaking tasks, speeds up and automates existing practices, transforms social and economic relations and offers new forms of cultural activity, personal empowerment and modes of play. In **Code Space**, Rob Kitchin and Martin Dodge examine software from a spatial perspective, analyzing the dyadic relationship of software and space. The production of space, they argue, is increasingly dependent on code, and code is written to produce space. Examples of code space include airport check-in areas, networked offices and cafés that are transformed into workspaces by laptops and wireless access. Kitchin and Dodge argue that software, through its ability to do work in the world, transduces space. Then Kitchin and Dodge develop a set of conceptual tools for identifying and understanding the interrelationship of software, space and everyday life, and illustrate their arguments with rich empirical material. And finally, they issue a manifesto calling for critical scholarship into the production and workings of code, rather than simply the technologies it enables: a new kind of social science focused on explaining the social, economic and spatial contours of software. **A Simple Guide to Pregnancy & Baby's First Year** Princess Ivana Pignatelli Aragona
