complex highly uncertain and politically sensitive problems that are of greatest concern to government decision makers The future of decision science perhaps even the nation's well being depends on the outcome A major difficulty for the analysts who are being called upon by government to apply decision aiding approaches is that decision science has not yet evolved a universally accepted methodology for analyzing social decisions involving risk Numerous approaches have been proposed including variations of cost benefit analysis decision analysis and applied social welfare theory Each of these however has its limitations and deficiencies and none has a proven track record for application to government decisions involving risk Cost benefit approaches have been extensively applied by the government but most applications have been for decisions that were largely risk free
