A Distant Technology J. P. Telotte, 1999 Science fiction films celebrate and critique the impact of a burgeoning technology on the world's cultural political and social milieu The Machine Age roughly delineated by the two decades between World Wars was a watershed period during which modern society entered into an ambiguous embrace with technology that continues today J P Telotte carefully blends film technology cultural and genre studies to illuminate this nearly forgotten era in our cinematic history and to show through analysis of classics like *The Invisible Ray* *Metropolis* and

Things to Come how technology played a major role as motif actor and producer What he also discovers as he ranges among the American British Russian French and German science fiction cinema as well as mainstream films figures and cultural products such as the New York World's Fair is a fundamental ambivalence embedded in the films themselves about the very machine age ethos they promoted Even as advances in the technical apparatus of filmmaking elevated it from mere entertainment to a medium of general communication and genuine artistic expression Machine Age science fiction films remained curiously distant from and often skeptical of the very machines on which their narratives focus The resulting tensions Telotte writes thus seem to intersect with those implicit in a Western world that was struggling with its own transition into the modern rendering the films task inevitably paradoxical and difficult

A Journey to the Center of the Earth Jules Gabriel Verne, 2009 *The Art of the Text* Susan R Harrow, 2013-09-15 The Art of the Text contributes to the fast developing dialogue between textual studies and visual culture studies It focuses on the processes through which writers think and readers respond visually and in essays by researchers in literature screen and visual studies the volume explores the visuality of the literary and non literary text with a sustained focus on French material of the later nineteenth and twentieth centuries Visuality is appraised here not as a state but as a set of processes of adaptation resistance negotiation and transformation By reading visually the contributors here reactivate the visual textual relations of canonical texts from Romanticism to Naturalism Surrealism to high Modernism from film to fan literature television to picture language

The Mysterious Island Jules Verne, 2013-09-01 At a time when Verne is making a comeback in the US as a mainstream literary figure Wesleyan is pleased to publish a new translation of one of his best known novels The Mysterious Island Although several editions under the same title are in print most reproduce a bowdlerized nineteenth century translation which changes the names of the characters omits several important scenes and ideologically censors Verne's original text The Mysterious Island was published in 1874 and it is one of Verne's longest novels The plot depicts a group of men who have become castaways stranded on an island in the Pacific during the American Civil War The novel describes their attempts not only to survive but also with the aid of the scientific and technological know how to rebuild their world from the meager resources of the island At the end however it is realized that Captain Nemo from Twenty Thousand Leagues Under the Sea has secretly been helping the settlers A marvelous adventure story The Mysterious Island is also notable for its modern retelling of the utopian deserted island myth with repeated echoes of Robinson Crusoe and the Swiss Family Robinson This Wesleyan edition features notes appendices and an introduction by Verne scholar William Butcher as well as reproductions of the illustrations from the original French edition
