Integrated and Participatory Water Resources

Management - Theory Rodolfo Soncini-Sessa, Enrico Weber, Andrea Castelletti, 2007-10-16 Covering the more recent advances in Modelling Planning Management and Negotiations for Integrated Water Resource Management this text brings together knowledge and concepts from Hydrology System Analysis Control Theory Conflict Resolution and Decision and Negotiation Theory Without compromising on mathematical rigour the book maintains a fine line between theory and application methodology and tools avoiding getting locked into excessively theoretical and formal development of the issues

discussed The non technical aspects of water resource systems such as societal political and legal concerns are recognized throughout the book as having a great if not fundamental importance to reaching an agreed upon decision they are therefore integrated into the more technical and mathematical issues The book provides a unified coordinated and comprehensive framework that will facilitate the increasingly appropriate application of the Integrated Water Resource Management paradigm by current and future practising professionals decision makers and scientists Integration of technical modelling and control aspects with participatory and decision making issues Insightful and comprehensive treatment of theoretical contents supported by practical examples A wide collection of exercises and project examples based on real world case studies with complete solutions
