

SEPARATION OF POWERS

Separation of powers "is the division of the legislative, executive, and judicial functions of government among separate and independent bodies" (Duingan & DeCarlo, 2019, p. 58).

DEFINITION

Separation of powers is a political theory, legal doctrine, and political institution which implies the distribution of state power between independent branches such as legislative, executive, and judicial. Each branch balances the power of the others and ensures no one branch oversteps its authority.

BRANCHES OF POWER

- **Legislature** - this is the elected body with the power to create laws in a parliament.
- **Executive** - this is the administrative body with the power to implement laws, and often declare war.
- **Judiciary** - enforces laws and adjudicates on whether the legislature and executive are acting legally or constitutionally.

The Principle of the Separation of Powers Zoltán Balázs, 2016-12-13 The separation of powers is one of the most cherished principles of constitutional government in the Western tradition Despite its prestigious status however it has always been controversial It has been attacked for being inadequate to account for institutional realities for being inapplicable to parliamentary systems for lacking a convincing normative grounding and even for being harmful inasmuch as it hampers both the immediate enforcement of popular will and efficient political leadership Current political crises all over the world especially the rise of populist democracies and authoritarian regimes however make the principle worth a closer more positive examination This book takes stock of the criticisms of the principle of separation of powers and attempts to offer a new normative account of it It argues that the separation of powers cannot be restricted to governmental institutions agencies and decision making procedures Rather it must be derived from the very basics of government from the very notions of political order and articulated government and from the distinct though related concepts of social and governmental power and of authority Once these distinctions are made institutional separations are easier to be established Contrary to the classical and most contemporary conceptions of the principle the present account argues for a relational and negative conception of the separation of powers The legislative branch is conceived of as the one where political authority political power and social power are all equally represented The executive branch is best understood as excluding social power whereas the judicial branch is marked for its opposition to the influence of political power This conception avoids the pitfalls of essentialism and functionalism and makes the principle applicable in a much wider international context

Power and Principle in the Market Place Jacob Dahl Rendtorff, 2016-04-08 In the global financial crisis the need to develop a new kind of economy with a closer relation between ethics and economics has become an important challenge to the international society This book contributes to this debate by investigating different aspects of global business ethics and corporate social responsibility which are becoming more and more important in the ongoing discussions on the relation between market institutions and democratic governments The different chapters of the book deal with fundamental philosophical issues of the ethics of the market economy including discussions of the role of the social sciences and economics in contributing to a sustainable economics and global responsibility in the twenty first century In this sense the book takes up the transnational

debate on ethics and economics in order to contribute to a more balanced fair just and conscientious development in the world The book starts with a European perspective on these issues based on philosophical sociological and economic views from Europe These views are further developed in order to share thoughts of how to improve corporate social responsibility welfare and justice and the advancement of ethical principles in the international context It is argued that in the international community good corporate citizenship as social and environmental responsibility is realized through individual and organizational cosmopolitan responsibility for fostering the common good for humanity The chapters of the book were originally presented at a conference in Copenhagen organized together with the German Cultural Institute the Goethe Institute of Copenhagen Copenhagen Business School and Roskilde University Denmark
