familiar form of privacy protection effective No Meg Leta Jones explains in *The Character of Consent* rather than promote functionality privacy and decentralization cookie technology has instead made the internet invasive limited and clunky Good thing then that the cookie is set for retirement in 2024 In this eye opening book Jones tells the little known story of this broken consent arrangement tracing it back to the major transnational conflicts around digital consent over the last twenty five years What she finds is that the policy controversy is not in fact an information crisis it s an identity crisis Instead of asking how people consent Jones asks who exactly is consenting and to what Packed into those cookie pop ups she explains are three distinct areas of law with three different characters who can consent Within mainly European data protection law the data subject consents Within communication privacy law the user consents And within consumer protection law the privacy consumer consents These areas of law have very different histories motivations institutional structures expertise and strategies so consent and the characters who can consent plays a unique role in those areas of law *The Character of Consent* gives each computer character its due taking us back to their origin stories within the legal history of computing By doing so Jones provides alternative ways of understanding the core issues within the consent dilemma More importantly she offers bold new approaches to creating and adopting better tech policies in the future

Bennett, Charles Raab, 2006-05-11 Analyzes privacy policy instruments available to contemporary industrial states from government regulations and transnational regimes to self regulation and privacy enhancing technologies Privacy protection according to Colin Bennett and Charles Raab involves politics and public policy as much as it does law and technology Moreover the protection of our personal information in a globalized borderless world means that privacy related policies are inextricably interdependent In this updated paperback edition of The Governance of Privacy Bennett and Raab analyze a broad range of privacy policy instruments available to contemporary advanced industrial states from government regulations and transnational regimes to self regulation and privacy enhancing technologies They consider two possible dynamics of privacy regulation a race to the bottom with competitive deregulation by countries eager to attract global investment in information technology versus a race to the top with the progressive establishment of global privacy standards Bennett and Raab begin by discussing the goals of privacy protection the liberal and individualist assumptions behind it and the neglected relationship between privacy and social equity They describe and evaluate different policy instruments including the important 1995 Directive on Data Protection from the European Union as well as the general efficacy of the top down statutory approach and self regulatory and technological alternatives to it They evaluate the interrelationships of these policy instruments and their position in a global framework of regulation and policy by state and non state actors And finally they consider whether all of this policy activity at international national and corporate levels necessarily means higher levels of privacy protection
