Contemporary Issues in Science and Technology Education Ben Akpan, Bulent Cavas, Teresa Kennedy, 2023-02-24

This edited volume discusses major issues in present-day science and technology education. STE is divided into three thematic sections: philosophical foundations and curriculum development; sustainable development, technology, and society; and the learning sciences and 21st-century skills. Section I examines the history and future of STE curriculum development along with specific issues within this dynamic area. Section II explores sustainable development in three important aspects: economic development, social development, and environmental protection. Section III covers the 21st-century skills that are of overarching importance to the success of learners in school and the world of work. Anchoring each chapter is an assemblage of veteran science and technology education specialists selected from across the world. The book's target is a worldwide audience of undergraduate, postgraduate students, and their teachers, as well as researchers. This book's exploration of the ever-increasing advances in STE and its narrative writing style will be of interest to a broad range of readers.

Food Chemistry Dennis D. Miller, C. K. Yeung, 2022-03-15

FOOD CHEMISTRY: A manual designed for Food Chemistry Laboratory courses that meet Institute of Food Technologists undergraduate education standards for degrees in Food Science. In the newly revised second edition of *Food Chemistry: A Laboratory Manual*, two professors with a combined 50 years of experience teaching food chemistry and dairy chemistry laboratory courses deliver an in-depth exploration of the fundamental chemical principles that govern the relationships between the composition of foods and food ingredients and their functional, nutritional, and sensory properties. Readers will discover practical laboratory exercises, methods, and techniques that are commonly employed in food chemistry research and food product development. Every chapter offers introductory summaries of key methodological concepts and interpretations of the results obtained from food experiments. The book provides a supplementary online Instructor's Guide, useful for adopting professors, that includes a Solutions Manual and Preparation Manual for laboratory sessions. The latest edition presents additional experiments, updated background material, and references, expanded end-of-chapter problem sets, expanded use of chemical structures, and a thorough emphasis on practical food chemistry problems encountered in food processing, storage, transportation, and preparation. Comprehensive explorations of complex interactions between food components, beyond simply measuring concentrations, are provided. Additional experiments, references, and chemical structures are included. Numerous laboratory exercises, sufficient for a one-semester course, are provided. Perfect for students of food science and technology, *Food Chemistry: A Laboratory Manual* will also earn a place in the libraries of food chemists, food product developers, analytical chemists, lab technicians, food safety, and processing
