Rabe,K. Dietrich,Thomas Strowitzki,2012-12-06 Our knowledge of reproductive medicine has expanded rapidly since the birth of Louise Brown the first baby to be conceived by in vitro fertilization which was performed

by Professors Patrick Steptoe and Bob Edwards in Oldham England in 1978. Hardly a year goes by without the development of a new or a modification of an existing method of assisted reproduction. Within a relatively short period, in vitro fertilization has been introduced into the treatment of female infertility. Intracytoplasmic sperm injection has also created new opportunities for the treatment of male infertility. The first edition of this book was published in 1996. In the second edition, most of the chapters have been updated and additional interest is focused on intracytoplasmic sperm injection (ICSI) in view of the risk of malformations in newborns. This manual addresses the techniques of assisted reproduction that are available today. Competent authors from various centers present in a concise way their tried and tested procedures so that the latter can be readily implemented. Due to different legal regulations, the scope of assisted reproduction is much more limited in Germany than in many other countries. For example, whereas only three embryos may be created and transferred in Germany, such restrictions do not exist in several other European countries and the United States. Furthermore, heterologous fertilization, oocyte donation, and surrogate motherhood are banned in Germany.

This volume contains the papers accepted for presentation at Iberamia 2008 held in Lisbon, Portugal, in October 2008. For this conference, 147 papers were submitted for the main track and 46 papers were accepted. Each submitted paper was reviewed by three members of the Program Committee, coordinated by an Area Chair. In certain cases, extra reviewers were recruited to write additional reviews. The list of Area Chairs, PC members, and reviewers can be found on the pages that follow. The authors of the submitted papers represent 14 countries with topics covering the whole spectrum of themes in AI, robotics, and multiagent systems, knowledge representation and constraints, machine learning and planning, natural language processing, and AI applications. The program for Iberamia 2008 also included three invited speakers: Christian Lemaitre (LANIA, Mexico), R.
