There is a relatively high use of complementary and alternative medicine CAM especially dietary supplements among people with multiple sclerosis MS Health professionals with CAM information can improve the quality of patient care by guiding patients away from possibly harmful therapies and if appropriate towards low risk possibly effective therapies Dietary Supplements and Multiple Sclerosis is meant to be referred to when people with MS ask a question about a particular dietary supplement Supplements are arranged in alphabetical order under the most commonly used name In addition the index contains a listing of these common names as well as less common names that may be encountered The main information about the supplements is written in a concise summary form that usually discusses only the MS relevance of the supplement The supplements selected for inclusion are those with specific MS relevance such as those that are known to be used by people with MS have claimed efficacy for slowing disease progression or relieving MS symptoms interact with drugs commonly used to treat MS and potentially worsen MS or its symptoms Also supplements are reviewed that are popular in the general population or are known to have serious adverse effects **Farming the Woods** Ken Mudge, Steve Gabriel, 2014 Learn how to fill forests with food by viewing agriculture from a remarkably different perspective that a healthy

forest can be maintained while growing a wide range of food medicinal and other nontimber products The practices of forestry and farming are often seen as mutually exclusive because in the modern world agriculture involves open fields straight rows and machinery to grow crops while forests are reserved primarily for timber and firewood harvesting In Farming the Woods authors Ken Mudge and Steve Gabriel demonstrate that it doesn't have to be an either/or scenario but a complementary one forest farms can be most productive in places where the plow is not on steep slopes and in shallow soils Forest farming is an invaluable practice to integrate into any farm or homestead especially as the need for unique value added products and supplemental income becomes increasingly important for farmers Many of the daily indulgences we take for granted such as coffee chocolate and many tropical fruits all originate in forest ecosystems But few know that such abundance is also available in the cool temperate forests of North America Farming the Woods covers in detail how to cultivate harvest and market high value nontimber forest crops such as American ginseng shiitake mushrooms ramps wild leeks maple syrup fruit and nut trees ornamentals and more Along with profiles of forest farmers from around the country readers are also provided comprehensive information on historical perspectives of forest farming mimicking the forest in a changing climate cultivation of medicinal crops cultivation of food crops creating a forest nursery harvesting and utilizing wood products the role of animals in the forest farm and how to design your forest farm and manage it once it's established Farming the Woods is an essential book for farmers and gardeners who have access to an established woodland are looking for productive ways to manage it and are interested in incorporating aspects of agroforestry permaculture forest gardening and sustainable woodlot management into the concept of a whole farm organism
