TO DISASSEMBLE MAGAZINE: Withdraw magazine from pistol and remove all cartridges. (Check chamber to be certain no cartridge remains in it.) Hold magazine upside down in left hand so that hole in Block (A607) is accessible. With right hand, insert drift punch in hole and depress Retaining Plunger (A628) approximately 1/8". Slide the Block forward slowly **BEING VERY CAREFUL TO KEEP PLUNGER AND SPRING (A610) UNDER CONTROL.** If not contained, these parts will fly out with considerable force. Therefore keep bottom end of the magazine pointed away from persons and objects. With Block fully removed, Plunger and Spring should be slowly withdrawn. Now holding magazine that is left hand, align Follower Button (A625-82) with circular opening near lower end of magazine body and lift out Button. Follower (A629) can then be removed. Assemble in reverse order, being careful to contain Spring and Plunger as Button is slid and locked into place. After assembly has been completed, test Follower 50 rounds; it has free movement.

NOTE: If no price appears in the "Stainless" column, the part is available in blind steel only and is used on all models. Likewise, if no price appears in the "Blind" column, the part is available in stainless steel only and is used on all models. A few components, as example grip panels, are the same for blind and stainless models.

We believe that Americans have a right to purchase and use firearms for lawful purposes. The private ownership of firearms in America is traditional, but that ownership imposes the responsibility on the gun owner to use his firearms in a way which will ensure his own safety and that of others. When firearms are used in a safe and responsible manner, they are a great source of pleasure and satisfaction, and represent a fundamental part of our personal liberty.

Firearms do not cause accidents! Firearms accidents are almost always forced to have been the result of carelessness, or ignorance on the part of the shooter of the basic rules of safe gun handling.

The following rules must be observed by gun users at all times. Safe gun handling is not just desirable, it is absolutely essential to the continuation of gun ownership and sport shooting as we know it today.

1. LEARN THE MECHANICAL AND HANDLING CHARACTERISTICS OF THE FIREARM YOU ARE USING. Not all firearms are the same. The method of carrying and handling firearms varies in accordance with the mechanical provisions for avoiding accidental discharge and the various proper procedures for loading and unloading. No person should handle any firearms without first having thoroughly familiarized himself with the particular type of firearm he is using, and with safe gun handling in general.

Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Twenty Years of School-based Mass Shootings in the United States Angelyn Spaulding Flowers, Cotina Lane Pixley, 2020-10-05 Twenty Years of School based Mass Shootings in the United States: Columbine to Santa Fe is an examination of twenty years of school based mass shootings from Columbine to Santa Fe, exploring the larger environmental framework within which these incidents occurred. Angelyn Spaulding Flowers and Cotina Lane Pixley use a mixed methods approach to examine a diverse set of factors identifying risk and protective factors along with specifically desired public policy responses by evaluating the convergence of variables from the range of school based mass shootings included in this study. These variables include the type of weapon used, the availability of that type of weapon, perpetrator characteristics, school characteristics, as well as the geospatial and demographic characteristics of the school neighborhood. These school based mass shooting incidents are explored at both the state and regional level and are further discussed in comparison to leisure time gun use, homicide rates, and suicide rates in the geographical area. The overarching geospatial analytical framework for this research also includes an examination of the manner in which existing policy enactments such as state gun laws vary by geography. Spaulding Flowers and Lane Pixley argue that the increased number of fatalities in school based mass shooting is largely due to the increased lethality of the weapons and they propose alternative solutions. Scholars of criminology, sociology, political science, and history will find this book particularly useful.
