2 Existing techniques for developing assuring and certifying computer based critical systems are inadequate 3 Formal methods have the potential for playing the same role in the development of computer based systems as applied mathematics does for other engineering disciplines and 4 Formal methods have had limited impact on the development of computer based systems and supporting technologies The goal of the workshop was to complete the following tasks 1 Assess the problems retarding the development of trustworthy critical systems 2 Determine the potential impact of applying formal methods techniques to the development of trustworthy critical systems 3 Determine the research and development required to facilitate a broader application of formal methods techniques 4
