and Nehemiah Lester L. Grabbe, 2019-06-18 This extract from the Eerdmans Commentary on the Bible provides Grabbe's introduction to and concise commentary on Ezra and Nehemiah. The Eerdmans Commentary on the Bible presents in nontechnical language the best of modern scholarship on each book of the Bible including the Apocrypha. Reader friendly commentary complements succinct summaries of each section of the text and will be valuable to scholars, students and general readers. Rather than attempt a verse by verse analysis, these volumes work from larger sense units highlighting the place of each passage within the overarching biblical story. Commentators focus on the genre of each text: parable, prophetic oracle, legal code and so on, interpreting within the historical and literary context. The volumes also address major issues within each biblical book including the range of possible interpretations and refer readers to the best resources for further discussions.

T&T Clark Handbook of Anthropology and the Hebrew Bible Emanuel Pfoh, 2022-12-15 This handbook presents an overview of the main approaches from social and cultural anthropology to the Hebrew Bible. Since the late 19th century, biblical scholarship has addressed issues and themes related to biblical stories from a perspective which could now be considered socio-anthropological. It is however only since the 1960s that biblical scholars have started to produce readings and incorporate analytical models drawn directly from social anthropology to widen the interpretive scope of the social and historical data contained in the biblical sources. The handbook is arranged into two main thematic parts. Part 1 assesses the place of the Bible in social anthropology, examines the contribution of ethnoarchaeology to the recovery of the social world of Iron Age Palestine and offers insights from the anthropology of the Mediterranean for the interpretation of the biblical stories. Part 2 provides a series of case studies on anthropological themes arising in the Hebrew Bible. These include kinship and social organisation, death, cultural and collective memory and ritualism. Contributors also examine how the biblical stories reveal dynamics of power and authority, gender and honour and shame and how socio-anthropological approaches can reveal these narratives and deepen our knowledge of the human societies and cultural context of the texts. Bringing together the expertise of scholars of the Hebrew Bible and Biblical Archaeology, this ethnographic introduction prompts new questions into our understanding of anthropology and the Bible.
