Context Sensitive Health Informatics: Sustainability in Dynamic Ecosystems R. Marcilly,C.E. Kuziemy, C. Nøhr,2019-08-16 The digital transformation of healthcare delivery remains a work in progress and contextual variation continues to be one of the barriers to the development of sustainable health information technology Context sensitive health informatics concerns health information technologies and their environments which may be people such as patients users designers and evaluators but also non human constructs such as organizations work practices guidelines and protocols or buildings and markets This book presents papers from CSHI 2019 the international conference on Context Sensitive Health Informatics held in Lille France on 23 and 24 August 2019 The subtitle of the conference was Sustainability in Dynamic Ecosystems and the thirty papers included here are divided into six sections understanding organizational contexts towards sustainable EHR different contexts for medication errors and patient safety methods and models to study contexts for health information systems citizens in health contexts and designing and evaluating in contexts Two keynote speeches from the conference are also included With its focus on context sensitivity and sustainability in digital healthcare the book will be of interest to all those working in the field of health informatics

Learner-Centered Teaching Activities for Environmental and Sustainability Studies Loren B. Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all course situations

given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues *Bulletin* ,1996 **Dynamic Aquaria** Walter H. Adey,2024-03-11 **Dynamic Aquaria** Building and Restoring Ecosystems and the Biosphere Fourth Edition demonstrates how the living systems modeling of aquatic ecosystems for ecological biological physiological research and ecosystem restoration produce answers to very complex ecological questions The book describes unique characteristics of water that have allowed carbon chemistry to flourish and evolve life over 4 billion years along with current disruptions such as global warming overfishing and chemical pollution New content in this edition includes the use of LED lighting DNA sequencing in microcosm construction and analysis and the expansion of the bioengineered tool Algal Turf Scrubbing ATS to combat global pollution problems The book also features new information on marine calcification research microcosms thermogeography and methods of water movement for minimizing plankton loss It supports a deeper biological and ecological intelligence among the human population to better understand the processes behind environmental issues Offers the basic physical and chemical background necessary for understanding aquatic and marine ecosystems Expands available electro mechanical tools for developing living system models Features new information on the biomimicry water control system Algal Turf Scrubbing ATS Evidences how ecosystem modeling can contribute to the understanding of climate change **Im-Voyages Child/Adolesc-Ence** Spencer A. Reconfiguring Global Climate Governance in North America Marcela Lopez-Vallejo, 2016-04-08 Global climate governance has presented problems that have led to failures yet it has also opened the door to new transregional governance schemes especially in North America This book introduces an environmental dimension into the concept of governance Almost fifteen years after the climate global governance concept emerged results worldwide have not been as favorable as expected This book details previous discussions about the concept of global climate governance and its limits It highlights how the Kyoto Protocol has a limited design taking into account a national approach to global regional and transnational problems had no obligatory mechanisms for implementation and explains the emergence of new polluters not committed under it such as China and India Furthermore this book explores other levels of authority such as regional institutions the North American agreement on trade NAFTA and on environment NAAEC as well as the regional energy working group NAEWG The author puts forward a theoretical proposal for re territorialization and coordination of policies for climate change into new forms of articulating interests in what she terms transnational green economic regions TGERs and tests this on two case studies the Regional Greenhouse Gas Initiative RGGI and the Western Climate Initiative WCI This study presents the challenges and opportunities of a transregional approach in North America *Proceedings of the 2004 Northeastern Recreation Research Symposium* Kelly Bricker, Sarah J.
