This is the 3rd book in a series of record collectors books by R Duane Cozzen This book consist of female rock bands from the 60s who played their own instruments The bands represented made an impact on the rock scene of the day and are from various countries These records are hard to come by and many are extremely rare A lot of these bands were overlooked during the 60s and many labels considered them novelty groups but they were very serious about their music Finding these recordings will be a challenge but that s what record collecting is all about It is hoped that this book will help in your search in building your record collection      *Billboard* ,1952-09-27 In its 114th year Billboard remains the world s premier weekly

Kunst,2012-12-06 One day in the summer of 1921 a postal delivery brought me a little packet of reprints from the periodical Djawa articles about Indonesian music by Dr JAAP KUNST which until that moment had not come to my notice A cursory glance was enough to convince me that the author was a very gifted man who had made a sound and absolutely scientific study of the subject and thereby made a valuable contribution by means of careful observation and actual tone measurements to the facts known from the older studies by GRONEMAN LAND and ELLIS These measure ments were particularly satisfying to me personally since they constituted an astonishing confirmation of a hypothesis concerning the genesis of tone systems through the cycle of blown fifths which I had propounded two years previously without however having published it At the same time it was proved through the perfect conformity existing between the measured and the theoretical absolute pitches

vibration frequencies that Indonesian gamelan tuning too belongs to the radius of ancient Chinese culture much the same as is the case with Pan pipes and xylo phones all over the world The first contact between Dr KUNST and myself led to a regular correspondence which especially contributed to a further development of the above mentioned theory of tone systems
