Monson,Megan Myres McMillan,2025-04-10 Digital library terminology like accessible discoverable and searchable usually presumes passive collections waiting to be found by motivated information seekers Rarely do we envision collection managers initiating outreach with those most likely to benefit from the collections This new collection from Core flips the script exploring the many ways that digital library practitioners at various types of cultural institutions proactively promote their unique resources Providing both inspiration and pragmatic guidance to readers as they undertake their own initiatives this book discusses the results of a unique survey that provides new and structured information on digital library outreach and instruction presents outreach case studies illustrating uses of social media promotion integration of digital collections into teaching and instruction activities partnerships with external campus units or community organizations and other activities explores many types of instruction from drop in class sessions and training to course integrated instruction and ways that digital library practitioners can contribute to the Open Educational Resources OER and open pedagogy movements details the digital humanities and digital scholarship programs developed at the University of Utah by many of the authors through cross departmental collaboration describes the ways in which the pandemic spurred many institutions to use rapid response collecting to practice community engagement and speculates on future directions for outreach and instruction for digital libraries *The Plugged-In Professor* Sharmila Ferris,Hilary Wilder,2013-05-15 New technologies are transforming the way students work The Plugged in Professor provides a timely and exceptional resource for using social media and other new technologies to help college students meet both general and discipline specific objectives The title covers techniques built around well known social networking technologies as well as other emerging technologies such as mobile phone and tablet apps With a practical focus and reader friendly format this book shows educators how to apply techniques in each technology and includes clear student learning objectives step by step directions observations and advice and supplemental readings and resources Twenty five chapters by leading contributors cover key aspects of new technologies in education in four parts Writing research and information fluency Communication and collaboration Critical thinking and creativity and Integrative learning Provides a cutting edge resource for academics and practitioners in effective ways of reaching today s students through the use of their favourite tool social media Outlines a range of strategies taking advantage of the unique learning styles and habits of net generation learners Exposes students to ways in which these technologies can be used in their professional and personal lives **Open Source Library Systems** Robert Wilson,James Mitchell,2021-09-11 Open source software and applications are all around us

and it's no different in today's libraries. Knowing about the open source alternative to integrated library system and being able to make accurate comparisons can save a library tens to hundreds of thousands of dollars a year while more closely matching the library's functional needs. The fact is that the foundational software in place in nearly every industry is being built with open source components. Where software applications are still proprietary or closed, those systems are themselves often built upon open source applications like open source web services, database management systems, programming languages, and operating systems. It's the same story in the library world. Library software providers offering the latest and greatest software solution for many thousands of dollars a year are building these solutions with open source software. However, full-fledged open source applications built with the same underlying technologies are available to libraries at no cost for the software itself. Each of these applications has their own unique and interesting history and communities supporting them. For the reader unfamiliar with open source software or apprehensive about using these applications in their library, this guide introduces the history of open source, demonstrates the global upward trend of adopting open source technologies in general and within libraries in particular, debunks various myths about implementing and using open source technologies, discusses several different types of library information systems including Integrated Library Systems, Institutional Repositories, Digital Asset Management Systems, Online Public Access Catalogs, Resource Sharing, Electronic Resource Management, and lastly shares real-world experiences in getting started with open source solutions including discussing what systems and services are available and best practices for implementation and use.

Creating Digital Exhibits for Cultural Institutions Emily Marsh, 2023-03-28. Creating Digital Exhibits for Cultural Institutions will show you how to create digital exhibits and experiences for your users that will be informative, accessible, and engaging. Illustrated with real-world examples of digital exhibits from a range of GLAMs, the book addresses the many analytical aspects and practical considerations involved in the creation of such exhibits. It will support you as you go about analyzing content to find hidden themes, applying principles from the museum exhibit literature, placing your content within internal and external information ecosystems, selecting exhibit software, and finding ways to recognize and use your own creativity. Demonstrating that an exhibit provides a useful and creative connecting point where your content, your organization, and your audience can meet, the book also demonstrates that such exhibits can provide a way to revisit difficult and painful material in a way that includes frank and enlightened analyses of issues such as racism, colonialism, sexism, class, and LGBTQI issues. Creating Digital Exhibits for Cultural Institutions is an essential resource for librarians, archivists, and other cultural heritage professionals who want to promote their institution's digital content to the widest possible audience. Academics and students working in the fields of library and information science, museum studies, and digital humanities will also find much to interest them within the pages of this book.

History in the Digital Age Toni Weller, 2013. The digital age is affecting all aspects of historical study, but much of the existing literature about history in the digital age can be alienating to the traditional historian who does not

necessarily value or wish to embrace digital resources History in the Digital Age takes a more conceptual look at how the digital age is affecting the field of history for both scholars and students The printed copy the traditional archive and analogue research remain key constitute parts for most historians and for many will remain precious and esteemed over digital copies but there is a real need for historians and students of history to seriously consider some of the conceptual and methodological challenges facing the field of historical enquiry as we enter the twenty first century Including international contributors from a variety of disciplines History English Information Studies and Archivists this book does not seek either to applaud or condemn digital technologies but takes a more conceptual view of how the field of history is being changed by the digital age Essential reading for all historians

Participatory archives in a world of ubiquitous media Natalie Pang,Kai Khiun Liew,Brenda Chang,2017-10-02 The media environment of today is characterised by two critical factors the development and adoption of ubiquitous mobile devices and the strengthening of connectivity enabled by advances in ICT infrastructure and social media platforms These developments have changed interactions and relationships between citizens and cultural custodians as well as the ways archives are developed kept and used Archives are now characterised by greater socialisations and networks that actively contribute to the signification of cultural heritage value A range of new stakeholders many of whom include the public have sought to define what needs to be collectively remembered and forgotten The world in which one or a few professional archivists worked on the sole mission of shaping how a society remembers is being displaced by a more democratised culture and the new generation of digitally networked archivists that are its natives Using a range of case studies and perspectives this book provides insights to the many ways that ubiquitous media have influenced archival practices and research as well as the social and civic consequences of present day archives This book was published as a special issue of Archives and Manuscripts
