work more effectively with their teaching assistants to promote children's learning. Specifically focused for early career teachers, this book provides valuable support for managing this vital but potentially challenging relationship. *Working Effectively With Your Teaching Assistant* supports teachers in maintaining classroom relationships including working with the expert or inexperienced TA. It explains different TA roles including the role of the classroom TA or learning support assistant, the special needs assistant, and 1:1 TA. It covers different forms of intervention including pre and over learning and the importance of ensuring that all children access quality first teaching. It shows how to work collaboratively including ways of sharing planning and feedback, differentiation strategies, promoting independence, and how to support each other beyond the classroom. Featuring quotes from TAs about their classroom experience and what would help them, plus solutions for when things don't go to plan, this book will help primary teachers to have a significant impact on learning while saving themselves time and reducing stress.

New Trends of Research in Ontologies and Lexical Resources Alessandro Oltramari, Piek Vossen, Lu Qin, Eduard Hovy, 2013-02-01. In order to exchange knowledge, humans need to share a common lexicon of words as well as to access the world models underlying that lexicon. What is a natural process for a human turns out to be an extremely hard task for a machine: computers can't represent knowledge as effectively as humans do, which hampers, for example, meaning disambiguation and communication. Applied ontologies and NLP have been developed to face these challenges. Integrating ontologies with possibly multilingual lexical resources is an essential requirement to make human language understandable by machines and also to enable interoperability and computability across information systems and ultimately in the Web. This book explores recent advances in the integration of ontologies and lexical resources, including questions such as building the required infrastructure (e.g., the Semantic Web) and different formalisms, methods, and platforms for eliciting, analyzing, and encoding knowledge contents (e.g., multimedia, emotions, events, etc.). The contributors look towards next generation technologies, shifting the focus from the state of the art to the future of Ontologies and Lexical Resources. This work will be of interest to research scientists, graduate students, and professionals in the fields of knowledge engineering, computational linguistics, and semantic technologies.

Technology for SEND in Primary Schools Helen Caldwell, Stephen Cullingford-Agnew, 2017-10-23. With so many new education technologies being developed and made available to schools, how do teachers ensure they select resources that enhance inclusive teaching in the classroom? How can you make sure new technologies are integrated into every day teaching? This new text supports trainee and beginning teachers to harness the power of technology to make their classrooms truly inclusive. It helps you make informed selections of new technology and resources and make them work for everyone in your classroom. Along with clear guidance on how to implement an inclusive approach to the use of technology across a broad range of needs and curriculum themes, linking practical examples with discussion of pedagogical considerations, this practical book focuses on cutting edge technologies, supports teachers to develop the knowledge and skills they need, offers advice on how to assess individual learning and communication needs.

develops an understanding of the pedagogy needed to embed inclusive technology within whole class teaching

Supporting the Development of Speech, Language and Communication in the Early Years Diana McQueen, Jo Williams, 2022-10-21 Speech and language impairment can have a huge impact on cognitive development Identifying what is going wrong and what effective intervention looks like can be daunting Short of retraining you as a speech and language therapist this thorough guide will give you everything you need to change that An essential resource the book contains a wide variety of online resources including phonological and sound awareness documents assessment tools and recording forms that can be downloaded straight to your device providing excellent materials and activities to use in the classroom Written by speech and language therapists and designed exclusively for Early Years practitioners this book provides a complete overview of how children acquire language and what language impairments look like at this age You will find both strategic and practical advice on how to manage and encourage the development of speech and language skills Creating the optimum communication environment for every child in your setting is an important part of what the book offers Equally practitioners are supported to be able to recognise the features of specific language difficulties such as Developmental Language Disorder DLD and feel confident to intervene when children are struggling

Visualizing the Semantic Web Vladimir Geroimenko, Chaomei Chen, 2013-06-29 Vladimir Geroimenko and Chaomei Chen The Semantic Web is a vision that has sparked a wide ranging enthusiasm for a new generation of the Web The Semantic Web is happening The central idea of this vision is to make the Web more understandable to computer programs so that people can make more use of this gigantic asset The use of metadata data about data can clearly indicate the meaning of data on the Web so as to provide computers with enough information to handle such data On the future Web many additional layers will be required if we want computer programs to handle the semantics the meaning of data properly without human intervention Such layers should deal with the hierarchical relationships between meanings their similarities and differences logical rules for making new inferences from the existing data and metadata etc Dozens of new technologies have emerged recently to implement these ideas XML eXtensible Markup Language forms the foundation of the future Web RDF Resource Description Framework Topic Maps and many other technologies help to erect a multi storey building of the Semantic Web layer by layer by adding new features and new types of metadata According to Tim Berners Lee the inventor of the current Web and the Semantic Web it may take up to ten years to complete the building The new Web will be much more complex than the current one and will contain enormous amounts of metadata as well as data
